## FUND SUMMARY – Monarch Ambassador Income Index ETF

**Investment Objective:** The Monarch Ambassador Income Index ETF (the “Fund”) seeks to replicate investment results that generally correspond, before fees and expenses, to the performance of the Monarch Ambassador Income Index (the “Index”).

**Fees and Expenses of the Fund:** This table describes the fees and expenses that you may pay if you buy, hold and sell shares of the Fund. **You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the table and example below.**

<b>Annual Fund Operating Expenses</b> (expenses that you pay each year as a percentage of the value of your investment)	
Management Fees	0.85%
Distribution and Service (12b-1) Fees	0.00%
Other Expenses	0.22%
Acquired Fund Fees and Expenses <sup>(1)</sup>	0.14%
Total Annual Fund Operating Expenses	1.21%
Expense Recapture <sup>(2)</sup>	0.05%
Total Annual Fund Operating Expenses	1.26%

- (1) Acquired Fund Fees and Expenses are the indirect costs of investing in other investment companies. The operating expenses in this fee table will not correlate to the expense ratio in the Fund’s financial highlights because the financial statements include only the direct operating expenses incurred by the Fund.
- (2) The Fund’s adviser has contractually agreed to reduce its fees and/or absorb expenses of the Fund, until at least June 30, 2026, to ensure that total annual fund operating expenses after fee waiver and/or reimbursement (exclusive of (i) any front-end or contingent deferred loads; (ii) brokerage fees and commissions, (iii) acquired fund fees and expenses; (iv) fees and expenses associated with investments in other collective investment vehicles or derivative instruments (including for example option and swap fees and expenses); (v) borrowing costs (such as interest and dividend expense on securities sold short); (vi) taxes; and (vii) extraordinary expenses, such as litigation expenses (which may include indemnification of Fund officers and Trustees, contractual indemnification of Fund service providers (other than the Adviser))) will not exceed 1.25% of average daily net assets. The fee waiver and expense reimbursements are subject to possible recoupment from the Fund in future years (within the three years after the fees have been waived or reimbursed), if such recoupment can be achieved within the lesser of the foregoing expense limits or those in place at the time of recapture. This agreement may be terminated by the Trust’s Board of Trustees only on 60 days’ written notice to the Fund’s adviser.

**Example:** This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other funds.

The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and then sell all of your shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses remain the same. Although your actual costs may be higher or lower, based upon these assumptions your costs would be:

<u>1 Year</u>	<u>3 Years</u>	<u>5 Years</u>	<u>10 Years</u>
\$128	\$389	\$670	\$1,470

**Portfolio Turnover:** The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the Example, affect the Fund’s performance. During the fiscal year ended February 28, 2025, the Fund’s portfolio turnover rate was 86% of the average value of its portfolio.

**Principal Investment Strategies:** The Fund invests at least 80% of its total assets in the constituents of the Index. The Index is designed to measure the performance of an investable universe of fixed income securities of varying credit quality and duration, including corporate bonds, lower-quality bonds, known as “high yield” or “junk” bonds, treasury bonds, municipal bonds, mortgage-backed securities and convertible bonds, that provide broad exposure to the U.S. and global bond market. The Index has approximately 12 ETF constituents which are weighted differently throughout the phases of the economic cycle (*i.e.*, expansion, peak, contraction, trough) in an effort to maximize risk-adjusted returns. The Index may have up to 12.5% in an alternative sleeve of instruments that could range from currency ETFs to commodity ETFs. The Fund does not invest more than 15% of its net assets in illiquid investments.

Kingsview Wealth Management LLC (the “Adviser”) is the Index provider. The Index follows a proprietary rules-based methodology that selects fixed income sectors based on the phase of the current economic cycle. The Index takes into account macroeconomic data about employment trends to determine the phase of the economic cycle and its relative strength to determine the Index constituents that are best suited for the particular phase of expansion or contraction. The Adviser may also consider certain corporate actions, such as initial public offerings, mergers, acquisitions, bankruptcies, suspensions, de-listings, tender offers and spin-offs when developing the constituents of the Index.

The Adviser utilizes a sub-adviser, Penserra Capital Management LLC (the “Sub-Adviser”), to manage the assets of the Fund. The Sub-Adviser uses a replication indexing strategy to manage the Fund. “Replication indexing” is a strategy in which a fund invests in substantially all of the securities in its underlying index in approximately the same proportions as in the underlying index.

The Index is sponsored by Solactive A.G. (“Solactive”), which is independent of the Fund, the Adviser and the Sub-Adviser. Solactive calculates and publishes the market value of the Index based on the index’s constituents. The Index is unmanaged and cannot be invested in directly.

**Principal Investment Risks:** *As with all funds, there is the risk that you could lose money through your investment in the Fund. Many factors affect the Fund’s net asset value (“NAV”) and performance.*

The following describes the risks the Fund bears with respect to its investments. As with any fund, there is no guarantee that the Fund will achieve its goal.

*Authorized Participant Risk.* Only an authorized participant may engage in creation or redemption transactions directly with the Fund. The Fund has a limited number of institutions that may act as authorized participants on an agency basis (i.e., on behalf of other market participants). To the extent that authorized participants exit the business or are unable to proceed with creation or redemption orders with respect to the Fund and no other authorized participant is able to step forward to create or redeem Creation Units (as defined below), Fund shares (“Shares”) may be more likely to trade at a premium or discount to net asset value and possibly face trading halts or delisting. Authorized participant concentration risk may be heightened for ETFs that invest in non-U.S. securities or other securities or instruments that have lower trading volumes.

*Call Risk.* During periods of falling interest rates, an issuer of a callable bond held by the Fund may “call” or repay the security before its stated maturity, and the Fund may have to reinvest the proceeds in securities with lower yields, which would result in a decline in the Fund’s income, or in securities with greater risks or with other less favorable features.

*Commodities Risk.* The Fund’s exposure to the commodities markets may subject the Fund to greater volatility than investments in traditional securities. The value of commodity-linked derivative instruments, commodity-based exchange traded trusts and commodity-based exchange traded funds and notes may be affected by changes in overall market movements, commodity index volatility, changes in interest rates, or sectors affecting a particular industry or commodity, such as drought, floods, weather, livestock disease, embargoes, tariffs, and international economic, political and regulatory developments.

*Convertible Bond Risk.* Convertible bonds are hybrid securities that have characteristics of both bonds and common stocks and are subject to fixed income security risks and conversion value-related equity risk. Convertible bonds are similar to other fixed-income securities because they usually pay a fixed interest rate and are obligated to repay principal on a given date in the future. The market value of fixed-income securities tends to decline as interest rates increase. Convertible bonds are particularly sensitive to changes in interest rates when their conversion to equity feature is small relative to the interest and principal value of the bond. Convertible issuers may not be able to make principal and interest payments on the bond as they become due. Convertible bonds may also be subject to prepayment or redemption risk.

*Credit Risk.* Debt issuers and other counterparties may be unable or unwilling to make timely interest and/or principal payments when due or otherwise honor their obligations. Changes in an issuer’s credit rating or the market’s perception of an issuer’s creditworthiness may also adversely affect the value of the Fund’s investment in that issuer. The degree of credit risk depends on an issuer’s or counterparty’s financial condition and on the terms of an obligation.

*Currency Risk.* The Fund’s investments in securities that trade in, and receive revenues in, foreign currencies, are subject to the risk that those currencies will decline in value relative to the U.S. dollar, or, in the case of hedging positions, that the U.S. dollar will decline in value relative to the currency being hedged. As a result, the Fund’s investments in foreign currency-denominated securities may reduce the Fund’s returns.

*Early Close/Trading Halt Risk.* An exchange or market may close or impose a market trading halt or issue trading halts on specific securities, or the ability to buy or sell certain securities or financial instruments may be restricted, which may prevent the Fund from buying or selling certain securities or financial instruments. In these circumstances, the Fund may be unable to rebalance its portfolio, may be unable to accurately price its investments and may incur substantial trading losses.

*ETF Structure Risk.* The Fund is structured as an ETF and as a result is subject to the special risks, including:

- *Not Individually Redeemable.* Shares are not individually redeemable to retail investors and may be redeemed only by the Fund and only to authorized participants at NAV in large blocks known as “Creation Units.” An authorized participant may incur brokerage costs purchasing enough Shares to constitute a Creation Unit.
- *Trading Issues.* An active trading market for Shares may not be developed or maintained. Trading in Shares on the Cboe BZX Exchange, Inc. (the “Exchange”) may be halted due to market conditions or for reasons that, in the view of the Exchange, make trading in Shares inadvisable, such as extraordinary market volatility.
- *Market Price Variance Risk.* The market prices of Shares will fluctuate in response to changes in NAV and supply and demand for Shares and will include a “bid-ask spread” charged by the exchange specialists, market makers or other participants that trade the particular security.
  - The market price of Shares may deviate from the Fund’s NAV, particularly during times of market stress, with the result that investors may pay significantly more or significantly less for Shares than the Fund’s NAV, which is reflected in the bid and ask price for Shares or in the closing price.

*Extension Risk.* During periods of rising interest rates, certain debt obligations may be paid off substantially more slowly than originally anticipated and the value of those securities may fall sharply, resulting in a decline in the Fund’s income and potentially in the value of the Fund’s investments.

*Fixed-Income Risk.* When the Fund invests in fixed income securities, the value of your investment in the Fund will fluctuate with changes in interest rates. Typically, a rise in interest rates causes a decline in the value of fixed income securities owned by the Fund. In general, the market price of fixed income securities with longer maturities will increase or decrease more in response to changes in interest rates than shorter-term securities. Other risk factors include credit risk (the debtor may default), extension risk (an issuer may exercise its right to repay principal on a fixed rate obligation held by the Fund later than expected), and prepayment risk (the debtor may pay its obligation early, reducing the amount of interest payments). These risks could affect the value of a particular investment by the Fund, possibly causing the Fund’s share price and total return to be reduced and fluctuate more than other types of investments. Current conditions may result in a rise in interest rates, which in turn may result in a decline in the value of the bond investments held by the Fund. As a result, for the present, interest rate risk may be heightened.

*Foreign Risk.* Investing in foreign (non-U.S.) securities may result in the Fund experiencing more rapid and extreme changes in value than a fund that invests exclusively in securities of U.S. companies, due to smaller markets, differing reporting, accounting and auditing standards, and nationalization expropriation or confiscatory taxation, currency blockage, or political changes or diplomatic developments.

*High-Yield Risk.* Lower-quality bonds, known as “high yield” or “junk” bonds, present greater risk than bonds of higher quality, including an increased risk of default. An economic downturn or period of rising interest rates could adversely affect the market for these bonds and reduce the Fund’s ability to sell its bonds. The lack of a liquid market for these bonds could decrease the Fund’s share price.

*Income Risk.* The Fund’s income may decline if interest rates fall. This decline in income can occur because the Fund may subsequently invest in lower yielding bonds as bonds in its portfolio mature, are near maturity or are called, bonds in the Index are substituted, or the Fund otherwise needs to purchase additional bonds.

*Interest Rate Risk.* Changing interest rates, including rates that fall below zero, may have unpredictable effects on markets, result in heightened market volatility and detract from the Fund’s performance to the extent the Fund is exposed to such interest rates. An increase in interest rates will generally cause the value of securities held by the Fund to decline, may lead to heightened volatility in the fixed-income markets and may adversely affect the liquidity of certain fixed-income investments, including those held by the Fund.

*Issuer Risk.* The performance of the Fund depends on the performance of individual securities to which the Fund has exposure. Changes in the financial condition or credit rating of an issuer of those securities may cause the value of the securities to decline.

*Market and Geopolitical Risk.* The increasing interconnectivity between global economies and financial markets increases the likelihood that events or conditions in one region or financial market may adversely impact issuers in a different country, region or financial market. Securities in the Fund's portfolio may underperform due to inflation (or expectations for inflation), interest rates, global demand for particular products or resources, natural disasters, climate-change and climate-related events, pandemics, epidemics, terrorism, tariffs and trade wars, regulatory events and governmental or quasi-governmental actions. The occurrence of global events similar to those in recent years may result in market volatility and may have long term effects on the U.S. financial market.

*Mortgage-Backed Securities Risk.* The Fund invests in mortgage-backed securities ("MBS") issued or guaranteed by the U.S. government or one of its agencies or sponsored entities, some of which may not be backed by the full faith and credit of the U.S. government. MBS represent interests in "pools" of mortgages and are subject to interest rate, prepayment, and extension risk. MBS react differently to changes in interest rates than other bonds, and the prices of MBS may reflect adverse economic and market conditions. Small movements in interest rates (both increases and decreases) may quickly and significantly reduce the value of certain MBS. MBS are also subject to the risk of default on the underlying mortgage loans, particularly during periods of economic downturn. Default or bankruptcy of a counterparty to a to-be-announced transaction would expose the Fund to possible losses.

*Passive Investment Risk.* The Fund is not actively managed and the Adviser will not sell a holding due to current or projected underperformance of a holding, industry or sector unless that holding is removed from the Index or selling the holding is otherwise required upon rebalancing of the Index as addressed in the Index methodology.

*Portfolio Turnover Risk.* A higher portfolio turnover will result in higher transactional and brokerage costs and may result in higher taxes when Shares are held in a taxable account.

*Prepayment Risk.* During periods of falling interest rates, issuers of certain debt obligations may repay principal prior to the security's maturity, which may cause the Fund to have to reinvest in securities with lower yields or higher risk of default, resulting in a decline in the Fund's income or return potential.

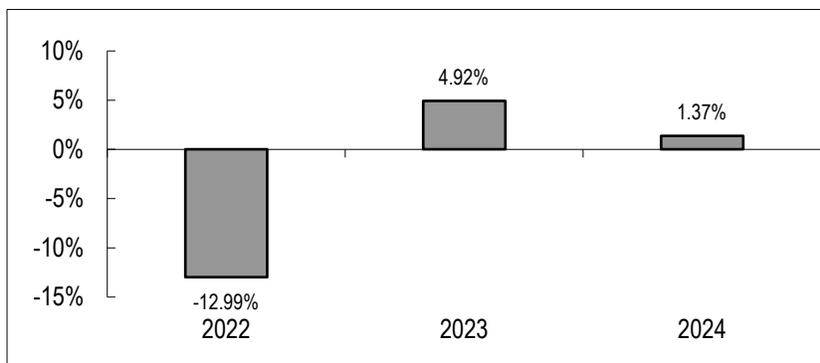

*Tracking Error Risk.* Tracking error is the divergence of the Fund's performance from that of the Index. Tracking error may occur because of an imperfect correlation between the Fund's holdings of portfolio securities and those in the Index, pricing difference, the Fund's holding of cash, difference in timing of the accrual of dividends, changes to the Index or the need to meet various regulatory requirements. This risk may be heightened during times of increased market volatility or other unusual market conditions. Tracking error also may result because the Fund incurs fees and expenses, while the Index does not.

*Underlying ETF Risk.* While the Underlying ETFs seek to provide certain investment outcomes, there is no guarantee that they will successfully do so. Because the Fund's value is based on the value of the Underlying ETFs, the Fund's investment performance largely depends on the investment performance and associated risks of the Underlying ETFs. The Underlying ETFs are subject to many of the same structural risks as the Fund that are described in more detail herein, such as ETF Structure Risk, Passive Investment Risk and Tracking Error Risk.

*U.S. Treasury Obligations Risk.* U.S. Treasury obligations may differ from other securities in their interest rates, maturities, times of issuance and other characteristics and may provide relatively lower returns than those of other securities. Similar to other issuers, changes to the financial condition or credit rating of the U.S. government may cause the value of the Fund's U.S. Treasury obligations to decline.

**Performance:** The bar chart and performance table below show the variability of the Fund's returns, which is some indication of the risks of investing in the Fund. The bar chart shows performance of the Fund's shares for each calendar year since the Fund's inception. The performance table compares the performance of the Fund over time to the performance of the Index and a broad-based securities market index. You should be aware that the Fund's past performance (before and after taxes) is not necessarily an indication of how the Fund will perform in the future. Updated performance information is available at no cost by visiting [www.monarchfunds.com](http://www.monarchfunds.com) or by calling toll free at (541) 291-4405.

**Performance Bar Chart For Calendar Year Ended December 31**

Best Quarter: 4<sup>th</sup> Quarter 2023 7.67%  
Worst Quarter: 3<sup>rd</sup> Quarter 2022 (6.60)%

The Fund's year-to-date return as of the most calendar quarter, which ended March 31, 2025 was 3.33%.

**Performance Table  
Average Annual Total Returns  
(For periods ended December 31, 2024)**

	One Year	Since Inception (3/23/21)
Return before taxes	1.37%	(1.70)%
Return after taxes on distributions	0.52%	(2.26)%
Return after taxes on distributions and sale of Fund shares	0.82%	(1.52)%
Index – Monarch Ambassador Income Index	1.53%	(1.47)%
Bloomberg U.S. Aggregate Bond Index*	1.25%	(1.50)%

\* The Bloomberg U.S. Aggregate Bond Index, or the Agg, is a broad based, market capitalization-weighted bond market index representing intermediate term investment grade bonds traded in the United States

**Investment Adviser:** Kingsview Wealth Management, LLC

**Investment Sub-Adviser:** Penserra Capital Management LLC (“Penserra”)

**Portfolio Managers:** Dustin Lewellyn, CFA, Managing Director of Penserra; and Ernesto Tong, CFA, Managing Director of Penserra, have each served the Fund as its portfolio managers since it commenced operations. Christine Johanson, CFA, Director of Penserra, has served the Fund as a portfolio manager since August 2024.

**Purchase and Sale of Fund Shares:** Individual Shares may be purchased and sold in secondary market transactions through a broker dealer or at market price. Shares are listed for trading on the Exchange and trade at market prices rather than NAV. Shares may trade at a price that is greater than, at, or less than NAV. An investor may incur costs attributable to the difference between the highest price a buyer is willing to pay to purchase Shares (bid) and the lowest price a seller is willing to accept for Shares (ask) when buying or selling Shares in the second market (the “bid-ask spread”). Information on the Fund's NAV, market price, premiums and discounts and bid-asks spreads is presented on the Fund's website at [www.monarchfunds.com](http://www.monarchfunds.com).

**Tax Information:** The Fund's distributions generally will be taxable as ordinary income or long-term capital gains. A sale of Shares may result in capital gain or loss.

**Payments to Broker-Dealers and Other Financial Intermediaries:** If you purchase the Fund through a broker-dealer or other financial intermediary (such as a bank), the Adviser or its related companies may pay the intermediary for the sale of Shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary's website for more information.

## FUND SUMMARY – Monarch Blue Chips Core Index ETF

**Investment Objective:** The Monarch Blue Chips Core Index ETF (the “Fund”) seeks to replicate investment results that generally correspond, before fees and expenses, to the performance of the Monarch Blue Chips Core Index (the “Index”).

**Fees and Expenses of the Fund:** This table describes the fees and expenses that you may pay if you buy, hold and sell shares of the Fund. **You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the table and example below.**

<b>Annual Fund Operating Expenses</b> (expenses that you pay each year as a percentage of the value of your investment)	
Management Fees	0.85%
Distribution and Service (12b-1) Fees	0.00%
Other Expenses	0.21%
Total Annual Fund Operating Expenses	1.06%
Expense Recapture <sup>(1)</sup>	0.08%
Total Annual Fund Operating Expenses	1.14%

- (1) The Fund’s adviser has contractually agreed to reduce its fees and/or absorb expenses of the Fund, until at least June 30, 2026, to ensure that total annual fund operating expenses after fee waiver and/or reimbursement (exclusive of (i) any front-end or contingent deferred loads; (ii) brokerage fees and commissions, (iii) acquired fund fees and expenses; (iv) fees and expenses associated with investments in other collective investment vehicles or derivative instruments (including for example option and swap fees and expenses); (v) borrowing costs (such as interest and dividend expense on securities sold short); (vi) taxes; and (vii) extraordinary expenses, such as litigation expenses (which may include indemnification of Fund officers and Trustees, contractual indemnification of Fund service providers (other than the Adviser))) will not exceed 1.25% of average daily net assets. The fee waiver and expense reimbursements are subject to possible recoupment from the Fund in future years (within the three years after the fees have been waived or reimbursed), if such recoupment can be achieved within the lesser of the foregoing expense limits or those in place at the time of recapture. This agreement may be terminated by the Trust’s Board of Trustees only on 60 days’ written notice to the Fund’s adviser.

**Example:** This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other funds.

The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and then sell all of your shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses remain the same. Although your actual costs may be higher or lower, based upon these assumptions your costs would be:

<u>1 Year</u>	<u>3 Years</u>	<u>5 Years</u>	<u>10 Years</u>
\$116	\$345	\$592	\$1,301

**Portfolio Turnover:** The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the Example, affect the Fund’s performance. During the fiscal year ended February 28, 2025, the Fund’s portfolio turnover rate was 75% of the average value of its portfolio.

**Principal Investment Strategies:** The Fund invests at least 80% of its total assets in the component securities of the Index. The Index consists of established, well-recognized companies listed on the S&P 500 from a broad range of industries that demonstrate strength in the marketplace based on fundamental company data such as revenue, revenue growth, net income, and net income growth. Kingsview Wealth Management LLC (the “Adviser”) is the Index provider. The Index follows a proprietary rules-based methodology that scores this fundamental company data of the companies listed on the S&P 500 to determine approximately 24 of the highest-ranking companies. These companies are typically equally weighted in the Index. Based on these factors, the Fund at any given time may have a significant percentage of its assets invested in one or more sectors relative to other sectors. As of February 28, 2025, the Index had over 25% exposure to the technology sector.

The Adviser utilizes a sub-adviser, Penserra Capital Management LLC (the “Sub-Adviser”), to manage the assets of the Fund. The Sub-Adviser uses a replication indexing strategy to manage the Fund. “Replication indexing” is a strategy in which a fund invests in substantially all of the securities in its underlying index in approximately the same proportions as in the underlying index.

The Index is sponsored by Solactive A.G. (“Solactive”), which is independent of the Fund, the Adviser and the Sub-Adviser. Solactive calculates and publishes the market value of the Index based on the Index’s constituents. The Index is unmanaged and cannot be invested in directly.

**Principal Investment Risks:** *As with all funds, there is the risk that you could lose money through your investment in the Fund. Many factors affect the Fund’s net asset value (“NAV”) and performance.*

The following describes the risks the Fund bears with respect to its investments. As with any fund, there is no guarantee that the Fund will achieve its goal.

**Authorized Participant Risk.** Only an authorized participant may engage in creation or redemption transactions directly with the Fund. The Fund has a limited number of institutions that may act as authorized participants on an agency basis (*i.e.*, on behalf of other market participants). To the extent that authorized participants exit the business or are unable to proceed with creation or redemption orders with respect to the Fund and no other authorized participant is able to step forward to create or redeem Creation Units (as defined below), Fund shares (“Shares”) may be more likely to trade at a premium or discount to net asset value and possibly face trading halts or delisting. Authorized participant concentration risk may be heightened for ETFs that invest in non-U.S. securities or other securities or instruments that have lower trading volumes.

**Early Close/Trading Halt Risk.** An exchange or market may close or impose a market trading halt or issue trading halts on specific securities, or the ability to buy or sell certain securities or financial instruments may be restricted, which may prevent the Fund from buying or selling certain securities or financial instruments. In these circumstances, the Fund may be unable to rebalance its portfolio, may be unable to accurately price its investments and may incur substantial trading losses.

**Equity Securities Risk.** Equity securities are susceptible to general stock market fluctuations and to volatile increases and decreases in value. The equity securities held by the Fund may experience sudden, unpredictable drops in value or long periods of decline in value. This may occur because of factors affecting securities markets generally, the equity securities of a particular sector, or a particular company.

**ETF Structure Risk.** The Fund is structured as an ETF and as a result is subject to the special risks, including:

- **Not Individually Redeemable.** Shares are not individually redeemable to retail investors and may be redeemed only by the Fund and only to authorized participants at NAV in large blocks known as “Creation Units.” An authorized participant may incur brokerage costs purchasing enough Shares to constitute a Creation Unit.
- **Trading Issues.** An active trading market for Shares may not be developed or maintained. Trading in Shares on the Cboe BZX Exchange, Inc. (the “Exchange”) may be halted due to market conditions or for reasons that, in the view of the Exchange, make trading in Shares inadvisable, such as extraordinary market volatility.
- **Market Price Variance Risk.** The market prices of Shares will fluctuate in response to changes in NAV and supply and demand for Shares and will include a “bid-ask spread” charged by the exchange specialists, market makers or other participants that trade the particular security.
  - The market price of Shares may deviate from the Fund’s NAV, particularly during times of market stress, with the result that investors may pay significantly more or significantly less for Shares than the Fund’s NAV, which is reflected in the bid and ask price for Shares or in the closing price.

**Issuer Risk.** The performance of the Fund depends on the performance of individual securities to which the Fund has exposure. Changes in the financial condition or credit rating of an issuer of those securities may cause the value of the securities to decline.

**Large Capitalization Company Risk.** The value of investments in larger companies may not rise as much as smaller companies, or larger companies may be unable to respond quickly to competitive challenges, such as changes in technology and consumer tastes.

**Market and Geopolitical Risk.** The increasing interconnectivity between global economies and financial markets increases the likelihood that events or conditions in one region or financial market may adversely impact issuers in a different country, region or financial market. Securities in the Fund’s portfolio may underperform due to inflation (or expectations for inflation), interest rates, global demand for particular products or resources, natural disasters, climate-change and climate-related events, pandemics, epidemics, terrorism, regulatory events, tariffs and trade wars, and governmental or quasi-governmental actions. The occurrence of global events similar to those in recent years may result in market volatility and may have long term effects on the U.S. financial market.

*Passive Investment Risk.* The Fund is not actively managed and the Adviser will not sell a holding due to current or projected underperformance of a holding, industry or sector unless that holding is removed from the Index or selling the holding is otherwise required upon rebalancing of the Index as addressed in the Index methodology.

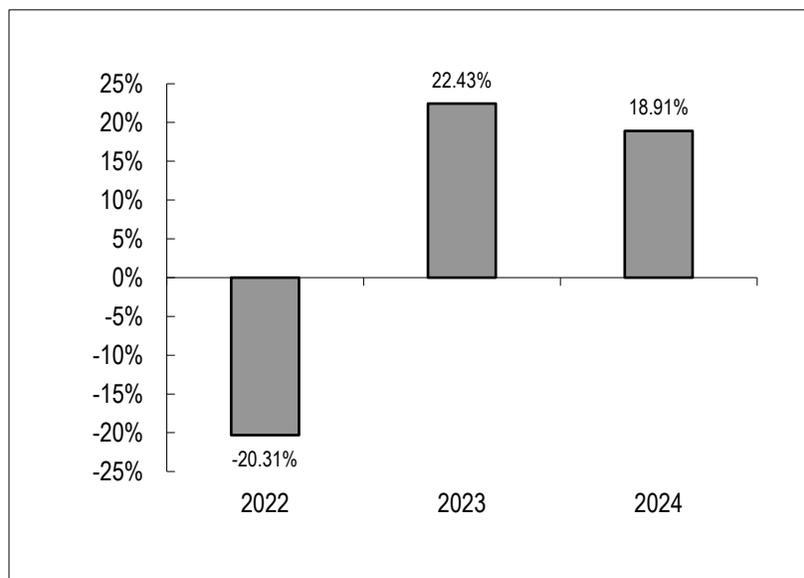

*Sector Exposure Risk.* The Fund may have significant exposure to a limited number of issuers conducting business in the same sector or group of sectors. Market conditions, interest rates, and economic, regulatory, or financial developments could significantly affect a single sector or a group of sectors, and the securities of companies in that sector or group of sectors could react similarly to these or other developments.

- *Technology Sector Risk.* The Fund may have significant exposure to the technology sector, and therefore the performance of the Fund could be negatively impacted by events affecting this sector. The value of stocks of technology companies and companies that rely heavily on technology are particularly vulnerable to rapid changes in technology product cycles, rapid product obsolescence, government regulation and competition, both domestically and internationally, including competition from foreign competitors with lower production costs. Stocks of technology companies and companies that rely heavily on technology, especially those of smaller, less-seasoned companies, tend to be more volatile than the overall market. Technology companies are heavily dependent on patent and intellectual property rights, the loss or impairment of which may adversely affect profitability. Additionally, technology companies may face dramatic and often unpredictable changes in growth rates and competition. Market or economic factors impacting technology companies and companies that rely heavily on technological advances could have a significant effect on the value of the Fund's investments.

*Tracking Error Risk.* Tracking error is the divergence of the Fund's performance from that of the Index. Tracking error may occur because of an imperfect correlation between the Fund's holdings of portfolio securities and those in the Index, pricing difference, the Fund's holding of cash, difference in timing of the accrual of dividends, changes to the Index or the need to meet various regulatory requirements. This risk may be heightened during times of increased market volatility or other unusual market conditions. Tracking error also may result because the Fund incurs fees and expenses, while the Index does not.

**Performance:** The bar chart and performance table below show the variability of the Fund's returns, which is some indication of the risks of investing in the Fund. The bar chart shows performance of the Fund's shares for each calendar year since the Fund's inception. The performance table compares the performance of the Fund over time to the performance of the Index and a broad-based securities market index. You should be aware that the Fund's past performance (before and after taxes) is not necessarily an indication of how the Fund will perform in the future. Updated performance information is available at no cost by visiting [www.monarchfunds.com](http://www.monarchfunds.com) or by calling toll free at (541) 291-4405.

**Performance Bar Chart For Calendar Year Ended December 31**

Best Quarter: 4<sup>th</sup> Quarter 2023 12.70%  
Worst Quarter: 2<sup>nd</sup> Quarter 2022 (15.02)%

The Fund's year-to-date return as of the most recent calendar quarter, which ended March 31, 2025 was (2.79)%.

**Performance Table**  
**Average Annual Total Returns**  
**(For periods ended December 31, 2024)**

	<b>One Year</b>	<b>Since Inception (3/23/21)</b>
Return before taxes	18.91%	9.09%
Return after taxes on distributions	18.91%	9.09%
Return after taxes on distributions and sale of Fund shares	11.20%	7.12%
Index – Monarch Blue Chips Core Index	19.23%	9.39%
S&P 500® Index*	25.02%	13.12%

\* The S&P 500® Index (the “Index”) is an unmanaged free-float capitalization-weighted index which measures the performance of 500 large-cap common stocks actively traded in the United States. Index returns assume reinvestment of dividends. Investors may not invest in the Index directly; unlike the Fund’s returns, the Index does not reflect any fees or expenses.

**Investment Adviser:** Kingsview Wealth Management, LLC

**Investment Sub-Adviser:** Penserra Capital Management LLC (“Penserra”)

**Portfolio Managers:** Dustin Lewellyn, CFA, Managing Director of Penserra; and Ernesto Tong, CFA, Managing Director of Penserra, have each served the Fund as its portfolio managers since it commenced operations. Christine Johanson, CFA, Director of Penserra, has served the Fund as a portfolio manager since August 2024.

**Purchase and Sale of Fund Shares:** Individual Shares may be purchased and sold in secondary market transactions through a broker dealer or at market price. Shares are listed for trading on the Exchange and trade at market prices rather than NAV. Shares may trade at a price that is greater than, at, or less than NAV. An investor may incur costs attributable to the difference between the highest price a buyer is willing to pay to purchase Shares (bid) and the lowest price a seller is willing to accept for Shares (ask) when buying or selling Shares in the second market (the “bid-ask spread”). Information on the Fund’s NAV, market price, premiums and discounts and bid-asks spreads is presented on the Fund’s website at [www.monarchfunds.com](http://www.monarchfunds.com).

**Tax Information:** The Fund’s distributions generally will be taxable as ordinary income or long-term capital gains. A sale of Shares may result in capital gain or loss.

**Payments to Broker-Dealers and Other Financial Intermediaries:** If you purchase the Fund through a broker-dealer or other financial intermediary (such as a bank), the Adviser or its related companies may pay the intermediary for the sale of Shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary’s website for more information.

## FUND SUMMARY – Monarch Dividend Plus Index ETF

**Investment Objective:** The Monarch Dividend Plus Index ETF (the “Fund”) seeks to replicate investment results that generally correspond, before fees and expenses, to the performance of the Monarch Dividend Plus Index (the “Index”).

**Fees and Expenses of the Fund:** This table describes the fees and expenses that you may pay if you buy, hold and sell shares of the Fund. **You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the table and example below.**

<b>Annual Fund Operating Expenses</b> (expenses that you pay each year as a percentage of the value of your investment)	
Management Fees	0.85%
Distribution and Service (12b-1) Fees	0.00%
Other Expenses	0.39%
<b>Total Annual Fund Operating Expenses</b>	<b>1.24%</b>

**Example:** This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other funds.

The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and then sell all of your shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses remain the same. Although your actual costs may be higher or lower, based upon these assumptions your costs would be:

<u>1 Year</u>	<u>3 Years</u>	<u>5 Years</u>	<u>10 Years</u>
\$126	\$393	\$681	\$1,500

**Portfolio Turnover:** The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the Example, affect the Fund’s performance. During the fiscal period ended February 28, 2025, the Fund’s portfolio turnover rate was 77% of the average value of its portfolio.

**Principal Investment Strategies:** The Fund invests at least 80% of its total assets in the constituents of the Index. The Index consists of 30 equally weighted U.S. stocks from the Russell 1000 Index that represent all economic sectors within the S&P 500 Index and that represent dividend paying value stocks that deliver dividend cash flows across all market cycles.

Kingsview Wealth Management LLC (the “Adviser”) is the Index provider. The Index follows a proprietary rules-based methodology that initially screens the companies listed on the Russell 1000, an index that represents the top 1000 companies by market capitalization, for both absolute and relative dividend growth and free cash flow generation metrics to determine its composition. The Index methodology assigns a composite score for each company based on its rankings for its potential to generate positive cash flow (as measured by its free cash flow to enterprise value ratio), debt-to-equity ratio, payout ratio, dividend growth and earnings stability. The 30 highest scoring companies are selected for the Index. These companies are expected to provide dividend income “plus” strong capital appreciation. The Index is reconstituted weekly. Any constituent that exceeds its target valuation (as calculated by its price-to-earnings ratio, return on equity, dividend payout ratio, and sales growth) is removed from the Index and new constituents are added in rank order to restore the Index to 30 constituents. Constituents that are removed from the Index are eligible for inclusion in the Index at the next reconstitution. Based on these factors, the Fund at any given time may have a significant percentage of its assets invested in one or more sectors relative to other sectors. As of February 28, 2025, the Index had over 25% exposure to the consumer staples sector.

The Adviser utilizes a sub-adviser, Penserra Capital Management LLC (the “Sub-Adviser”), to manage the assets of the Fund. The Sub-Adviser uses a replication indexing strategy to manage the Fund. “Replication indexing” is a strategy in which a fund invests in substantially all of the securities in its underlying index in approximately the same proportions as in the underlying index.

The index is sponsored by Solactive A.G. (“Solactive”), which is independent of the Fund, the Adviser and the Sub-Adviser. Solactive calculates and publishes the market value of the Index based on the Index’s constituents. The Index is unmanaged and cannot be invested in directly.

**Principal Investment Risks:** *As with all funds, there is the risk that you could lose money through your investment in the Fund. Many factors affect the Fund's net asset value ("NAV") and performance.*

The following describes the risks the Fund bears with respect to its investments. As with any fund, there is no guarantee that the Fund will achieve its goal.

**Authorized Participant Risk.** Only an authorized participant may engage in creation or redemption transactions directly with the Fund. The Fund has a limited number of institutions that may act as authorized participants on an agency basis (*i.e.*, on behalf of other market participants). To the extent that authorized participants exit the business or are unable to proceed with creation or redemption orders with respect to the Fund and no other authorized participant is able to step forward to create or redeem Creation Units (as defined below), Fund shares ("Shares") may be more likely to trade at a premium or discount to net asset value and possibly face trading halts or delisting. Authorized participant concentration risk may be heightened for ETFs that invest in non-U.S. securities or other securities or instruments that have lower trading volumes.

**Dividend-Paying Stock Risk.** While the Fund intends to invest in stocks of companies that have historically paid a high dividend yield, those companies may reduce or discontinue their dividends, reducing the yield of the Fund. Low priced stocks in the Fund may be more susceptible to these risks. Past dividend payments are not a guarantee of future dividend payments. Also, the market return of high dividend yield stocks, in certain market conditions, may perform worse than other investment strategies or the overall stock market. The Fund's emphasis on dividend-paying stocks involves the risk that such stocks may fall out of favor with investors and underperform the market. Also, a company may reduce or eliminate its dividend.

**Early Close/Trading Halt Risk.** An exchange or market may close or impose a market trading halt or issue trading halts on specific securities, or the ability to buy or sell certain securities or financial instruments may be restricted, which may prevent the Fund from buying or selling certain securities or financial instruments. In these circumstances, the Fund may be unable to rebalance its portfolio, may be unable to accurately price its investments and may incur substantial trading losses.

**Equity Securities Risk.** Equity securities are susceptible to general stock market fluctuations and to volatile increases and decreases in value. The equity securities held by a Fund may experience sudden, unpredictable drops in value or long periods of decline in value. This may occur because of factors affecting securities markets generally, the equity securities of a particular sector, or a particular company.

**ETF Structure Risk.** The Fund is structured as an ETF and as a result is subject to the special risks, including:

- **Not Individually Redeemable.** Shares are not individually redeemable to retail investors and may be redeemed only by the Fund and only to authorized participants at NAV in large blocks known as "Creation Units." An authorized participant may incur brokerage costs purchasing enough Shares to constitute a Creation Unit.
- **Trading Issues.** An active trading market for Shares may not be developed or maintained. Trading in Shares on the Cboe BZX Exchange, Inc. (the "Exchange") may be halted due to market conditions or for reasons that, in the view of the Exchange, make trading in Shares inadvisable, such as extraordinary market volatility.
- **Market Price Variance Risk.** The market prices of Shares will fluctuate in response to changes in NAV and supply and demand for Shares and will include a "bid-ask spread" charged by the exchange specialists, market makers or other participants that trade the particular security.
  - The market price of Shares may deviate from the Fund's NAV, particularly during times of market stress, with the result that investors may pay significantly more or significantly less for Shares than the Fund's NAV, which is reflected in the bid and ask price for Shares or in the closing price.

**Issuer Risk.** The performance of the Fund depends on the performance of individual securities to which the Fund has exposure. Changes in the financial condition or credit rating of an issuer of those securities may cause the value of the securities to decline.

**Limited History of Operations Risk.** The Fund has a limited history of operations for investors to evaluate.

**Market and Geopolitical Risk.** The increasing interconnectivity between global economies and financial markets increases the likelihood that events or conditions in one region or financial market may adversely impact issuers in a different country, region or financial market. Securities in the Fund's portfolio may underperform due to inflation (or expectations for inflation), interest rates, global demand for particular products or resources, natural disasters, climate-change and climate-related events, pandemics, epidemics, terrorism, regulatory events, tariffs and trade wars, and governmental or quasi-governmental actions. The occurrence of global events similar to those in recent years may result in market volatility and may have long term effects on the U.S. financial market.

**Passive Investment Risk.** The Fund is not actively managed and the Adviser will not sell a holding due to current or projected underperformance of a holding, industry or sector unless that holding is removed from the Index or selling the holding is otherwise required upon rebalancing of the Index as addressed in the Index methodology.

**Portfolio Turnover Risk.** A higher portfolio turnover will result in higher transactional and brokerage costs associated with the turnover, which may reduce the Fund's return, unless the securities traded can be bought and sold without corresponding commission costs. Frequent trading of securities may also increase the Fund's realized capital gains or losses, which may increase the taxes you pay as a Fund shareholder. The Fund is expected to have a high portfolio turnover rate.

**Sector Exposure Risk.** The Fund may have significant exposure to a limited number of issuers conducting business in the same sector or group of sectors. Market conditions, interest rates, and economic, regulatory, or financial developments could significantly affect a single sector or a group of sectors, and the securities of companies in that sector or group of sectors could react similarly to these or other developments.

- **Consumer Staples Sector Risk.** The consumer staples sector may be affected by the regulation of various product components and production methods, marketing campaigns and other factors affecting consumer demand.

**Tracking Error Risk.** Tracking error is the divergence of the Fund's performance from that of the Index. Tracking error may occur because of an imperfect correlation between the Fund's holdings of portfolio securities and those in the Index, pricing difference, the Fund's holding of cash, difference in timing of the accrual of dividends, changes to the Index or the need to meet various regulatory requirements. This risk may be heightened during times of increased market volatility or other unusual market conditions. Tracking error also may result because the Fund incurs fees and expenses, while the Index does not.

**Value Risk.** A company may be undervalued due to market or economic conditions, temporary earnings declines, unfavorable developments affecting the company and other factors. Securities purchased by the Fund that do not realize their full economic value may reduce the Fund's return.

**Performance:** Because the Fund does not have a full calendar year of investment operations, no performance information is presented for the Fund at this time. In the future, performance information will be presented in this section of the Prospectus. Also, shareholder reports containing financial and performance information will be mailed to shareholders semi-annually. Updated performance information is available at no cost by visiting [www.monarchfunds.com](http://www.monarchfunds.com) or by calling toll free at (541) 291-4405.

**Investment Adviser:** Kingsview Wealth Management, LLC

**Investment Sub-Adviser:** Penserra Capital Management LLC ("Penserra")

**Portfolio Managers:** Dustin Lewellyn, CFA, Managing Director of Penserra; and Ernesto Tong, CFA, Managing Director of Penserra, have each served the Fund as its portfolio managers since it commenced operations. Christine Johanson, CFA, Director of Penserra, has served the Fund as a portfolio manager since August 2024.

**Purchase and Sale of Fund Shares:** Individual Shares may be purchased and sold in secondary market transactions through a broker dealer or at market price. Shares are listed for trading on the Exchange and trade at market prices rather than NAV. Shares may trade at a price that is greater than, at, or less than NAV. An investor may incur costs attributable to the difference between the highest price a buyer is willing to pay to purchase Shares (bid) and the lowest price a seller is willing to accept for Shares (ask) when buying or selling Shares in the second market (the "bid-ask spread"). Information on the Fund's net asset value, market price, premiums and discounts and bid-asks spreads is on the Fund's website at [www.monarchfunds.com](http://www.monarchfunds.com).

**Tax Information:** The Fund's distributions generally will be taxable as ordinary income or long-term capital gains. A sale of Shares may result in capital gain or loss.

**Payments to Broker-Dealers and Other Financial Intermediaries:** If you purchase the Fund through a broker-dealer or other financial intermediary (such as a bank), the Adviser or its related companies may pay the intermediary for the sale of Shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary's website for more information.

## FUND SUMMARY – Monarch ProCap Index ETF

**Investment Objective:** The Monarch ProCap Index ETF (the “Fund”) seeks to replicate investment results that generally correspond, before fees and expenses, to the performance of the Monarch ProCap Index (the “Index”).

**Fees and Expenses of the Fund:** This table describes the fees and expenses that you may pay if you buy, hold and sell shares of the Fund. **You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the table and example below.**

<b>Annual Fund Operating Expenses</b> (expenses that you pay each year as a percentage of the value of your investment)	
Management Fees	0.85%
Distribution and Service (12b-1) Fees	0.00%
Other Expenses	0.16%
Acquired Fund Fees and Expenses <sup>(1)</sup>	0.06%
<b>Total Annual Fund Operating Expenses</b>	<b>1.07%</b>

(1) Acquired Fund Fees and Expenses are the indirect costs of investing in other investment companies. The operating expenses in this fee table will not correlate to the expense ratio in the Fund’s financial highlights because the financial statements include only the direct operating expenses incurred by the Fund.

**Example:** This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other funds.

The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and then sell all of your shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses remain the same. Although your actual costs may be higher or lower, based upon these assumptions your costs would be:

<u>1 Year</u>	<u>3 Years</u>	<u>5 Years</u>	<u>10 Years</u>
\$109	\$340	\$590	\$1,306

**Portfolio Turnover:** The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the Example, affect the Fund’s performance. During the fiscal year ended February 28, 2025, the Fund’s portfolio turnover rate was 118% of the average value of its portfolio.

**Principal Investment Strategies:** The Fund invests at least 80% of its total assets in the component securities of the Index. The Index consists of fixed income and equity ETFs that provide broad exposure to the U.S. and global bond market and to the S&P Global Industry Classification Standard (“GICS”) sectors. The Index is comprised of 6-9 constituents, with fixed income ETFs and equity ETFs collectively comprising at least 90% of the Index, with each being no less than 15% and no more than 75% of the Index. The equity allocation of the Index is further divided into sector allocations that represent the GICS sectors. The Index may have up to 10% in an alternative sleeve of instruments that could range from currency ETFs to commodity ETFs, such as gold.

The Index factors in macroeconomic data about employment trends to determine the phase of the economic cycle and its relative strength, and to determine the portfolio allocations that are best suited for the particular phase. The equity portion of the Index is typically equally weighted among five of the eleven GICS sectors that have historically had the best performance during the identified phase of the economic cycle. The phases of the economic cycle are expansion, peak, contraction and trough. During the expansion phase, the economy experiences relatively rapid growth, interest rates tend to be low, production increases, and inflationary pressures build. The peak of a cycle is reached when growth hits its maximum rate. Peak growth typically creates some imbalances in the economy that need to be corrected. This correction occurs through a period of contraction when growth slows, employment falls, and prices stagnate. The trough of the cycle is reached when the economy hits a low point and growth begins to recover.

Kingsview Wealth Management LLC (the “Adviser”) is the Index provider. The Index follows a proprietary rules-based methodology that reviews the current phase of the economic cycle to select both the fixed income ETFs of varying credit quality for the fixed income portion of the Fund as well as the individual sector ETFs for the equity portion of the Fund. The Adviser may also consider certain corporate actions, such as initial public offerings, mergers, acquisitions, bankruptcies, suspensions, de-listing, tender offers and spin-offs when developing the constituents of the Index.

The Adviser utilizes a sub-adviser, Penserra Capital Management LLC (the “Sub-Adviser”), to manage the assets of the Fund. The Sub-Adviser uses a replication indexing strategy to manage the Fund. “Replication indexing” is a strategy in which a fund invests in substantially all of the securities in its underlying index in approximately the same proportions as in the underlying index.

The index is sponsored by Solactive A.G. (“Solactive”), which is independent of the Fund, the Adviser and the Sub-Adviser. Solactive calculates and publishes the market value of the Index based on the Index’s constituents. The Index is unmanaged and cannot be invested in directly.

**Principal Investment Risks:** *As with all funds, there is the risk that you could lose money through your investment in the Fund. Many factors affect the Fund’s net asset value (“NAV”) and performance.*

The following describes the risks the Fund bears with respect to its investments. As with any fund, there is no guarantee that the Fund will achieve its goal.

*Authorized Participant Risk.* Only an authorized participant may engage in creation or redemption transactions directly with the Fund. The Fund has a limited number of institutions that may act as authorized participants on an agency basis (i.e., on behalf of other market participants). To the extent that authorized participants exit the business or are unable to proceed with creation or redemption orders with respect to the Fund and no other authorized participant is able to step forward to create or redeem Creation Units (as defined below), Fund shares (“Shares”) may be more likely to trade at a premium or discount to net asset value and possibly face trading halts or delisting. Authorized participant concentration risk may be heightened for ETFs that invest in non-U.S. securities or other securities or instruments that have lower trading volumes.

*Call Risk.* During periods of falling interest rates, an issuer of a callable bond held by the Fund may “call” or repay the security before its stated maturity, and the Fund may have to reinvest the proceeds in securities with lower yields, which would result in a decline in the Fund’s income, or in securities with greater risks or with other less favorable features.

*Commodities Risk.* The Fund’s exposure to the commodities markets may subject the Fund to greater volatility than investments in traditional securities. The value of commodity-linked derivative instruments, commodity-based exchange traded trusts and commodity-based exchange traded funds and notes may be affected by changes in overall market movements, commodity index volatility, changes in interest rates, or sectors affecting a particular industry or commodity, such as drought, floods, weather, livestock disease, embargoes, tariffs, and international economic, political and regulatory developments.

*Credit Risk.* Debt issuers and other counterparties may be unable or unwilling to make timely interest and/or principal payments when due or otherwise honor their obligations. Changes in an issuer’s credit rating or the market’s perception of an issuer’s creditworthiness may also adversely affect the value of the Fund’s investment in that issuer. The degree of credit risk depends on an issuer’s or counterparty’s financial condition and on the terms of an obligation.

*Currency Risk.* The Fund’s investments in securities that trade in, and receive revenues in, foreign currencies, are subject to the risk that those currencies will decline in value relative to the U.S. dollar, or, in the case of hedging positions, that the U.S. dollar will decline in value relative to the currency being hedged. As a result, the Fund’s investments in foreign currency-denominated securities may reduce the Fund’s returns.

*Early Close/Trading Halt Risk.* An exchange or market may close or impose a market trading halt or issue trading halts on specific securities, or the ability to buy or sell certain securities or financial instruments may be restricted, which may prevent the Fund from buying or selling certain securities or financial instruments. In these circumstances, the Fund may be unable to rebalance its portfolio, may be unable to accurately price its investments and may incur substantial trading losses.

*Equity Securities Risk.* Equity securities are susceptible to general stock market fluctuations and to volatile increases and decreases in value. The equity securities held by the Fund may experience sudden, unpredictable drops in value or long periods of decline in value. This may occur because of factors affecting securities markets generally, the equity securities of a particular sector, or a particular company.

*ETF Structure Risk.* The Fund is structured as an ETF and as a result is subject to the special risks, including:

- *Not Individually Redeemable.* Shares are not individually redeemable to retail investors and may be redeemed only by the Fund and only to authorized participants at NAV in large blocks known as “Creation Units.” An authorized participant may incur brokerage costs purchasing enough Shares to constitute a Creation Unit.
- *Trading Issues.* An active trading market for Shares may not be developed or maintained. Trading in Shares on the Cboe BZX Exchange, Inc. (the “Exchange”) may be halted due to market conditions or for reasons that, in the view of the Exchange, make trading in Shares inadvisable, such as extraordinary market volatility.
- *Market Price Variance Risk.* The market prices of Shares will fluctuate in response to changes in NAV and supply and demand for Shares and will include a “bid-ask spread” charged by the exchange specialists, market makers or other participants that trade the particular security.
  - The market price of Shares may deviate from the Fund’s NAV, particularly during times of market stress, with the result that investors may pay significantly more or significantly less for Shares than the Fund’s NAV, which is reflected in the bid and ask price for Shares or in the closing price.

*Extension Risk.* During periods of rising interest rates, certain debt obligations may be paid off substantially more slowly than originally anticipated and the value of those securities may fall sharply, resulting in a decline in the Fund’s income and potentially in the value of the Fund’s investments.

*Fixed-Income Risk.* When the Fund invests in fixed-income securities, the value of your investment in the Fund will fluctuate with changes in interest rates. Typically, a rise in interest rates causes a decline in the value of fixed income securities owned by the Fund. In general, the market price of fixed-income securities with longer maturities will increase or decrease more in response to changes in interest rates than shorter-term securities. Other risk factors include credit risk (the debtor may default), extension risk (an issuer may exercise its right to repay principal on a fixed rate obligation held by the Fund later than expected), and prepayment risk (the debtor may pay its obligation early, reducing the amount of interest payments). These risks could affect the value of a particular investment by the Fund, possibly causing the Fund’s share price and total return to be reduced and fluctuate more than other types of investments. An increase in interest rates may result in a decline in the value of the bond investments held by the Fund.

*Foreign Risk.* Investing in foreign (non-U.S.) securities may result in the Fund experiencing more rapid and extreme changes in value than a fund that invests exclusively in securities of U.S. companies, due to smaller markets, differing reporting, accounting and auditing standards, and nationalization expropriation or confiscatory taxation, currency blockage, or political changes or diplomatic developments.

*High-Yield Risk.* Lower-quality bonds, known as “high yield” or “junk” bonds, present greater risk than bonds of higher quality, including an increased risk of default. An economic downturn or period of rising interest rates could adversely affect the market for these bonds and reduce the Fund’s ability to sell its bonds. The lack of a liquid market for these bonds could decrease the Fund’s share price.

*Income Risk.* The Fund’s income may decline if interest rates fall. This decline in income can occur because the Fund may subsequently invest in lower yielding bonds as bonds in its portfolio mature, are near maturity or are called, bonds in the Index are substituted, or the Fund otherwise needs to purchase additional bonds.

*Interest Rate Risk.* Changing interest rates, including rates that fall below zero, may have unpredictable effects on markets, result in heightened market volatility and detract from the Fund’s performance to the extent the Fund is exposed to such interest rates. An increase in interest rates will generally cause the value of securities held by the Fund to decline, may lead to heightened volatility in the fixed-income markets and may adversely affect the liquidity of certain fixed-income investments, including those held by the Fund.

*Issuer Risk.* The performance of the Fund depends on the performance of individual securities to which the Fund has exposure. Changes in the financial condition or credit rating of an issuer of those securities may cause the value of the securities to decline.

*Market and Geopolitical Risk.* The increasing interconnectivity between global economies and financial markets increases the likelihood that events or conditions in one region or financial market may adversely impact issuers in a different country, region or financial market. Securities in the Fund’s portfolio may underperform due to inflation (or expectations for inflation), interest rates, global demand for particular products or resources, natural disasters, climate-change and climate-related events, pandemics, epidemics, terrorism, regulatory events, tariffs and trade wars, and governmental or quasi-governmental actions. The occurrence of global events similar to those in recent years may result in market volatility and may have long term effects on the U.S. financial market.

**Passive Investment Risk.** The Fund is not actively managed and the Adviser will not sell a holding due to current or projected underperformance of a holding, industry or sector unless that holding is removed from the Index or selling the holding is otherwise required upon rebalancing of the Index as addressed in the Index methodology.

**Portfolio Turnover Risk.** A higher portfolio turnover will result in higher transactional and brokerage costs and may result in higher taxes when Fund shares are held in a taxable account.

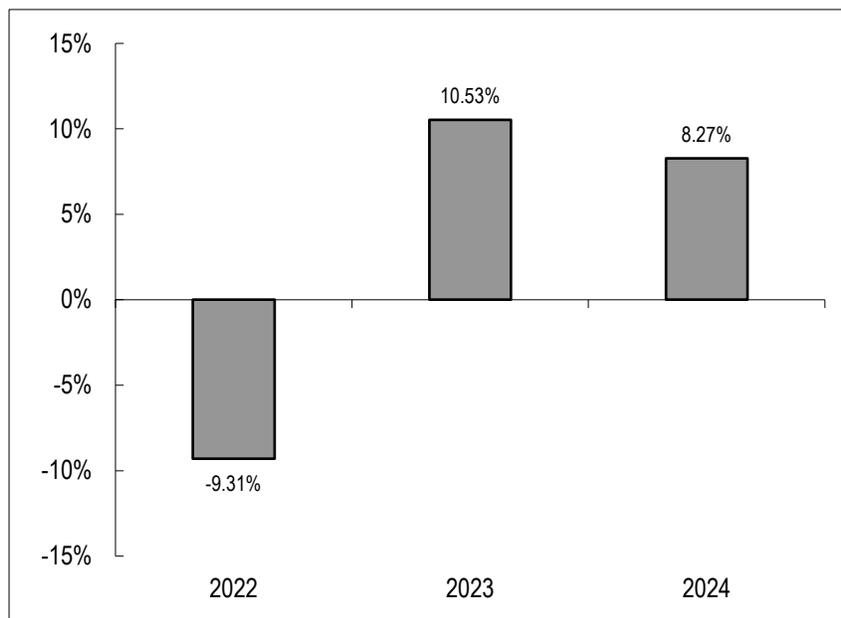

**Sector Exposure Risk.** The Fund may have significant exposure to a limited number of issuers conducting business in the same sector or group of sectors. Market conditions, interest rates, and economic, regulatory, or financial developments could significantly affect a single sector or a group of sectors, and the securities of companies in that sector or group of sectors could react similarly to these or other developments.

**Tracking Error Risk.** Tracking error is the divergence of the Fund's performance from that of the Index. Tracking error may occur because of an imperfect correlation between the Fund's holdings of portfolio securities and those in the Index, pricing difference, the Fund's holding of cash, difference in timing of the accrual of dividends, changes to the Index or the need to meet various regulatory requirements. This risk may be heightened during times of increased market volatility or other unusual market conditions. Tracking error also may result because the Fund incurs fees and expenses, while the Index does not.

**Underlying ETF Risk.** While the Underlying ETFs seek to provide certain investment outcomes, there is no guarantee that they will successfully do so. Because the Fund's value is based on the value of the Underlying ETFs, the Fund's investment performance largely depends on the investment performance and associated risks of the Underlying ETFs. The Underlying ETFs are subject to many of the same structural risks as the Fund that are described in more detail herein, such as ETF Structure Risk, Passive Investment Risk and Tracking Error Risk.

**Performance:** The bar chart and performance table below show the variability of the Fund's returns, which is some indication of the risks of investing in the Fund. The bar chart shows performance of the Fund's shares for each calendar year since the Fund's inception. The performance table compares the performance of the Fund over time to the performance of the Index, a broad-based securities market index, and a supplemental index. You should be aware that the Fund's past performance (before and after taxes) is not necessarily an indication of how the Fund will perform in the future. Updated performance information is available at no cost by visiting [www.monarchfunds.com](http://www.monarchfunds.com) or by calling toll-free at (541) 291-4405.

**Performance Bar Chart For Calendar Years Ended December 31**

Best Quarter: 4<sup>th</sup> Quarter 2023 9.94%  
Worst Quarter: 2<sup>nd</sup> Quarter 2022 (7.22)%

The Fund's year-to-date return as of the most calendar quarter, which ended March 31, 2025 was 1.21%.

**Performance Table**  
**Average Annual Total Returns**  
**(For periods ended December 31, 2024)**

	<b>One Year</b>	<b>Since Inception (3/23/21)</b>
Return before taxes	8.27%	5.27%
Return after taxes on distributions	7.66%	4.77%
Return after taxes on distributions and sale of Fund shares	5.00%	3.89%
Index – Monarch ProCap Index	8.32%	5.42%
Bloomberg U.S. Aggregate Bond Index*	1.25%	(1.50)%
S&P Target Risk Moderate Index**	7.97%	2.78%

\* The Bloomberg U.S. Aggregate Bond Index, or the Agg, is a broad base, market capitalization-weighted bond market index representing intermediate term investment grade bonds traded in the United States.

\*\* The S&P Target Risk Moderate Index is designed to measure the performance of moderate stock-bond allocations to fixed income while seeking to increase opportunities for higher returns through equities.

**Investment Adviser:** Kingsview Wealth Management, LLC

**Investment Sub-Adviser:** Penserra Capital Management LLC (“Penserra”)

**Portfolio Managers:** Dustin Lewellyn, CFA, Managing Director of Penserra; and Ernesto Tong, CFA, Managing Director of Penserra, have each served the Fund as its portfolio managers since it commenced operations. Christine Johanson, CFA, Director of Penserra, has served the Fund as a portfolio manager since August 2024.

**Purchase and Sale of Fund Shares:** Individual Shares may be purchased and sold in secondary market transactions through a broker dealer or at market price. Shares are listed for trading on the Exchange and trade at market prices rather than NAV. Shares may trade at a price that is greater than, at, or less than NAV. An investor may incur costs attributable to the difference between the highest price a buyer is willing to pay to purchase Shares (bid) and the lowest price a seller is willing to accept for Shares (ask) when buying or selling Shares in the second market (the “bid-ask spread”). Information on the Fund’s NAV, market price, premiums and discounts and bid-asks spreads is presented on the Fund’s website at [www.monarchfunds.com](http://www.monarchfunds.com).

**Tax Information:** The Fund’s distributions generally will be taxable as ordinary income or long-term capital gains. A sale of Shares may result in capital gain or loss.

**Payments to Broker-Dealers and Other Financial Intermediaries:** If you purchase the Fund through a broker-dealer or other financial intermediary (such as a bank), the Adviser or its related companies may pay the intermediary for the sale of Shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary’s website for more information.

## FUND SUMMARY – Monarch Select Subsector Index ETF

**Investment Objective:** The Monarch Select Subsector Index ETF (the “Fund”) seeks to replicate investment results that generally correspond, before fees and expenses, to the performance of the Monarch Select Subsector Index (the “Index”).

**Fees and Expenses of the Fund:** This table describes the fees and expenses that you may pay if you buy, hold and sell shares of the Fund. **You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the table and example below.**

<b>Annual Fund Operating Expenses</b> (expenses that you pay each year as a percentage of the value of your investment)	
Management Fees	0.85%
Distribution and Service (12b-1) Fees	0.00%
Other Expenses	0.23%
Acquired Fund Fees and Expenses <sup>(1)</sup>	0.35%
<b>Total Annual Fund Operating Expenses</b>	<b>1.43%</b>

(1) Acquired Fund Fees and Expenses are the indirect costs of investing in other investment companies. The operating expenses in this fee table will not correlate to the expense ratio in the Fund’s financial highlights because the financial statements include only the direct operating expenses incurred by the Fund.

**Example:** This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other funds.

The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and then sell all of your shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses remain the same. Although your actual costs may be higher or lower, based upon these assumptions your costs would be:

<u>1 Year</u>	<u>3 Years</u>	<u>5 Years</u>	<u>10 Years</u>
\$146	\$452	\$782	\$1,713

**Portfolio Turnover:** The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the Example, affect the Fund’s performance. During the fiscal period ended February 28, 2025, the Fund’s portfolio turnover rate was 172% of the average value of its portfolio.

**Principal Investment Strategies:** The Fund is a fund of funds that invests at least 80% of its total assets in the constituents of the Index. The Index consists of 10 equally-weighted U.S. listed ETFs of any market capitalization that represent economically advantageous U.S. sectors and subsectors.

Kingsview Wealth Management LLC (the “Adviser”) is the Index provider. The Index follows a proprietary rules-based methodology that selects which equity sectors and subsectors to invest in based on the phase of the economic cycle. The methodology uses employment trends to determine the phase of the economic cycle and identifies the sectors and subsectors that have historically performed well during such cycle. The Index methodology selects the ETFs that are expected to deliver the best risk adjusted return for the identified phase. Because the Fund may hold subsector ETFs from the same sector, the Fund at any given time may have a significant percentage of its assets invested in one or more sectors relative to other sectors. As of February 28, 2025, the Index had over 25% exposure to the healthcare sector.

The Adviser utilizes a sub-adviser, Penserra Capital Management LLC (the “Sub-Adviser”), to manage the assets of the Fund. The Sub-Adviser uses a replication indexing strategy to manage the Fund. “Replication indexing” is a strategy in which a fund invests in substantially all of the securities in its underlying index in approximately the same proportions as in the underlying index.

The index is sponsored by Solactive A.G. (“Solactive”), which is independent of the Fund, the Adviser and the Sub-Adviser. Solactive calculates and publishes the market value of the Index based on the Index’s constituents. The Index is unmanaged and cannot be invested in directly.

**Principal Investment Risks:** *As with all funds, there is the risk that you could lose money through your investment in the Fund. Many factors affect the Fund's net asset value ("NAV") and performance.*

The following describes the risks the Fund bears with respect to its investments. As with any fund, there is no guarantee that the Fund will achieve its goal.

**Authorized Participant Risk.** Only an authorized participant may engage in creation or redemption transactions directly with the Fund. The Fund has a limited number of institutions that may act as authorized participants on an agency basis (*i.e.*, on behalf of other market participants). To the extent that authorized participants exit the business or are unable to proceed with creation or redemption orders with respect to the Fund and no other authorized participant is able to step forward to create or redeem Creation Units (as defined below), Fund shares ("Shares") may be more likely to trade at a premium or discount to net asset value and possibly face trading halts or delisting. Authorized participant concentration risk may be heightened for ETFs that invest in non-U.S. securities or other securities or instruments that have lower trading volumes.

**Early Close/Trading Halt Risk.** An exchange or market may close or impose a market trading halt or issue trading halts on specific securities, or the ability to buy or sell certain securities or financial instruments may be restricted, which may prevent the Fund from buying or selling certain securities or financial instruments. In these circumstances, the Fund may be unable to rebalance its portfolio, may be unable to accurately price its investments and may incur substantial trading losses.

**Equity Securities Risk.** Equity securities are susceptible to general stock market fluctuations and to volatile increases and decreases in value. The equity securities held by a Fund may experience sudden, unpredictable drops in value or long periods of decline in value. This may occur because of factors affecting securities markets generally, the equity securities of a particular sector, or a particular company.

**ETF Structure Risk.** The Fund is structured as an ETF and as a result is subject to the special risks, including:

- **Not Individually Redeemable.** Shares are not individually redeemable to retail investors and may be redeemed only by the Fund and only to authorized participants at NAV in large blocks known as "Creation Units." An authorized participant may incur brokerage costs purchasing enough Shares to constitute a Creation Unit.
- **Trading Issues.** An active trading market for Shares may not be developed or maintained. Trading in Shares on the Cboe BZX Exchange, Inc. (the "Exchange") may be halted due to market conditions or for reasons that, in the view of the Exchange, make trading in Shares inadvisable, such as extraordinary market volatility.
- **Market Price Variance Risk.** The market prices of Shares will fluctuate in response to changes in NAV and supply and demand for Shares and will include a "bid-ask spread" charged by the exchange specialists, market makers or other participants that trade the particular security.
  - The market price of Shares may deviate from the Fund's NAV, particularly during times of market stress, with the result that investors may pay significantly more or significantly less for Shares than the Fund's NAV, which is reflected in the bid and ask price for Shares or in the closing price.

**Issuer Risk.** The performance of the Fund depends on the performance of individual securities to which the Fund has exposure. Changes in the financial condition or credit rating of an issuer of those securities may cause the value of the securities to decline.

**Limited History of Operations Risk.** The Fund has a limited history of operations for investors to evaluate.

**Market and Geopolitical Risk.** The increasing interconnectivity between global economies and financial markets increases the likelihood that events or conditions in one region or financial market may adversely impact issuers in a different country, region or financial market. Securities in the Fund's portfolio may underperform due to inflation (or expectations for inflation), interest rates, global demand for particular products or resources, natural disasters, climate-change and climate-related events, pandemics, epidemics, terrorism, regulatory events, tariffs and trade wars, and governmental or quasi-governmental actions. The occurrence of global events similar to those in recent years may result in market volatility and may have long term effects on the U.S. financial market.

**Passive Investment Risk.** The Fund is not actively managed and the Adviser will not sell a holding due to current or projected underperformance of a holding, industry or sector unless that holding is removed from the Index or selling the holding is otherwise required upon rebalancing of the Index as addressed in the Index methodology.

**Sector Exposure Risk.** The Fund may have significant exposure to a limited number of issuers conducting business in the same sector, subsector or group thereof. Market conditions, interest rates, and economic, regulatory, or financial developments could significantly affect a single sector, subsector, or a group thereof, and the securities of companies in that sector, subsector or group of thereof could react similarly to these or other developments.

**Healthcare Sector Risk.** The health care sector is subject to government regulation and reimbursement rates, as well as government approval of products and services, which could have a significant effect on price and availability, and can be significantly affected by product liability claims, rapid obsolescence, and patent expirations.

**Tracking Error Risk.** Tracking error is the divergence of the Fund's performance from that of the Index. Tracking error may occur because of an imperfect correlation between the Fund's holdings of portfolio securities and those in the Index, pricing difference, the Fund's holding of cash, difference in timing of the accrual of dividends, changes to the Index or the need to meet various regulatory requirements. This risk may be heightened during times of increased market volatility or other unusual market conditions. Tracking error also may result because the Fund incurs fees and expenses, while the Index does not.

**Turnover Risk.** A higher portfolio turnover will result in higher transactional and brokerage costs associated with the turnover, which may reduce the Fund's return, unless the securities traded can be bought and sold without corresponding commission costs. Frequent trading of securities may also increase the Fund's realized capital gains or losses, which may increase the taxes you pay as a Fund shareholder. The Fund is expected to have a high portfolio turnover rate.

**Underlying ETF Risk.** While the Underlying ETFs seek to provide certain investment outcomes, there is no guarantee that they will successfully do so. Because the Fund's value is based on the value of the Underlying ETFs, the Fund's investment performance largely depends on the investment performance and associated risks of the Underlying ETFs. The Underlying ETFs are subject to many of the same structural risks as the Fund that are described in more detail herein, such as ETF Structure Risk, Passive Investment Risk and Tracking Error Risk.

**Performance:** Because the Fund does not have a full calendar year of investment operations, no performance information is presented for the Fund at this time. In the future, performance information will be presented in this section of the Prospectus. Also, shareholder reports containing financial and performance information will be mailed to shareholders semi-annually. Updated performance information is available at no cost by visiting [www.monarchfunds.com](http://www.monarchfunds.com) or by calling toll free at (541) 291-4405.

**Investment Adviser:** Kingsview Wealth Management, LLC

**Investment Sub-Adviser:** Penserra Capital Management LLC ("Penserra")

**Portfolio Managers:** Dustin Lewellyn, CFA, Managing Director of Penserra; and Ernesto Tong, CFA, Managing Director of Penserra, have each served the Fund as its portfolio managers since it commenced operations. Christine Johanson, CFA, Director of Penserra, has served the Fund as a portfolio manager since August 2024.

**Purchase and Sale of Fund Shares:** Individual Shares may be purchased and sold in secondary market transactions through a broker dealer or at market price. Shares are listed for trading on the Exchange and trade at market prices rather than NAV. Shares may trade at a price that is greater than, at, or less than NAV. An investor may incur costs attributable to the difference between the highest price a buyer is willing to pay to purchase Shares (bid) and the lowest price a seller is willing to accept for Shares (ask) when buying or selling Shares in the second market (the "bid-ask spread"). Information on the Fund's net asset value, market price, premiums and discounts and bid-asks spreads is presented on the Fund's website at [www.monarchfunds.com](http://www.monarchfunds.com).

**Tax Information:** The Fund's distributions generally will be taxable as ordinary income or long-term capital gains. A sale of Shares may result in capital gain or loss.

**Payments to Broker-Dealers and Other Financial Intermediaries:** If you purchase the Fund through a broker-dealer or other financial intermediary (such as a bank), the Adviser or its related companies may pay the intermediary for the sale of Shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary's website for more information.

## FUND SUMMARY – Monarch Volume Factor Dividend Tree Index ETF

**Investment Objective:** The Monarch Volume Factor Dividend Tree Index ETF (the “Fund”) seeks to replicate investment results that generally correspond, before fees and expenses, to the performance of the Monarch Volume Factor Dividend Tree Index (the “Index”).

**Fees and Expenses of the Fund:** This table describes the fees and expenses that you may pay if you buy, hold and sell shares of the Fund. **You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the table and example below.**

<b>Annual Fund Operating Expenses</b> (expenses that you pay each year as a percentage of the value of your investment)	
Management Fees	0.85%
Distribution and Service (12b-1) Fees	0.00%
Other Expenses	0.34%
<b>Total Annual Fund Operating Expenses</b>	<b>1.19%</b>

**Example:** This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other funds.

The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and then sell all of your shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses remain the same. Although your actual costs may be higher or lower, based upon these assumptions your costs would be:

<u>1 Year</u>	<u>3 Years</u>	<u>5 Years</u>	<u>10 Years</u>
\$121	\$378	\$654	\$1,443

**Portfolio Turnover:** The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the Example, affect the Fund’s performance. During the fiscal period ended February 28, 2025, the Fund’s portfolio turnover rate was 264% of the average value of its portfolio.

**Principal Investment Strategies:** The Fund invests at least 80% of its total assets in the constituents of the Index. The Index uses proprietary “Volume Factor” methodology to identify specific areas of the market with positive cash flow. The Index consists of 40 equally-weighted individual stocks that demonstrate positive cash flow and an ability to pay dividends and up to 5 fixed income ETFs if the cash flow trend is negative. Only ETFs that provide exposure to short-term U.S. treasury securities are eligible for the Index.

Kingsview Wealth Management LLC (the “Adviser”) is the Index provider. The Index follows a proprietary rules-based methodology that screens 3,000 equities from the Russell 3000 of U.S. origin or exposure to identify stocks with potential for positive cash flow and dividend growth. The Adviser then applies its proprietary “Volume Factor” ranking methodology to generate a composite score for each stock based on its capital-weighted volume, price, and the relationship between trading volume and price as measured by the proprietary “Volume Price Confirmation Indicator.” The 40 highest scoring stocks are selected for the Index when capital flow trends are positive. The Index is reconstituted quarterly. Based on these factors, the Fund at any given time may have a significant percentage of its assets invested in one or more sectors relative to other sectors. As of February 28, 2025, the Index was not allocated more than 25% to any one sector.

When capital flow trends are negative, the Index reduces its exposure to equities and increases its exposure to fixed income ETFs up to 50% of the Index.

The Adviser utilizes a sub-adviser, Penserra Capital Management LLC (the “Sub-Adviser”), to manage the assets of the Fund. The Sub-Adviser uses a replication indexing strategy to manage the Fund. “Replication indexing” is a strategy in which a fund invests in substantially all of the securities in its underlying index in approximately the same proportions as in the underlying index.

The index is sponsored by Solactive A.G. (“Solactive”), which is independent of the Fund, the Adviser and the Sub-Adviser. Solactive calculates and publishes the market value of the Index based on the Index’s constituents. The Index is unmanaged and cannot be invested in directly.

**Principal Investment Risks:** *As with all funds, there is the risk that you could lose money through your investment in the Fund. Many factors affect the Fund's net asset value ("NAV") and performance.*

The following describes the risks the Fund bears with respect to its investments. As with any fund, there is no guarantee that the Fund will achieve its goal.

**Authorized Participant Risk.** Only an authorized participant may engage in creation or redemption transactions directly with the Fund. The Fund has a limited number of institutions that may act as authorized participants on an agency basis (*i.e.*, on behalf of other market participants). To the extent that authorized participants exit the business or are unable to proceed with creation or redemption orders with respect to the Fund and no other authorized participant is able to step forward to create or redeem Creation Units (as defined below), Fund shares ("Shares") may be more likely to trade at a premium or discount to net asset value and possibly face trading halts or delisting. Authorized participant concentration risk may be heightened for ETFs that invest in non-U.S. securities or other securities or instruments that have lower trading volumes.

**Call Risk.** During periods of falling interest rates, an issuer of a callable bond held by the Fund may "call" or repay the security before its stated maturity, and the Fund may have to reinvest the proceeds in securities with lower yields, which would result in a decline in the Fund's income, or in securities with greater risks or with other less favorable features.

**Credit Risk.** Debt issuers and other counterparties may be unable or unwilling to make timely interest and/or principal payments when due or otherwise honor their obligations. Changes in an issuer's credit rating or the market's perception of an issuer's creditworthiness may also adversely affect the value of the Fund's investment in that issuer. The degree of credit risk depends on an issuer's or counterparty's financial condition and on the terms of an obligation.

**Dividend Paying Risk.** While the Fund may hold stocks of companies that have historically paid a high dividend yield, those companies may reduce or discontinue their dividends, reducing the yield of the Fund. Low priced stocks in the Fund may be more susceptible to these risks. Past dividend payments are not a guarantee of future dividend payments. Also, the market return of high dividend yield stocks, in certain market conditions, may perform worse than other investment strategies or the overall stock market. The Fund's emphasis on dividend-paying stocks involves the risk that such stocks may fall out of favor with investors and underperform the market. Also, a company may reduce or eliminate its dividend.

**Early Close/Trading Halt Risk.** An exchange or market may close or impose a market trading halt or issue trading halts on specific securities, or the ability to buy or sell certain securities or financial instruments may be restricted, which may prevent the Fund from buying or selling certain securities or financial instruments. In these circumstances, the Fund may be unable to rebalance its portfolio, may be unable to accurately price its investments and may incur substantial trading losses.

**Equity Securities Risk.** Equity securities are susceptible to general stock market fluctuations and to volatile increases and decreases in value. The equity securities held by the Fund may experience sudden, unpredictable drops in value or long periods of decline in value. This may occur because of factors affecting securities markets generally, the equity securities of a particular sector, or a particular company.

**ETF Structure Risk.** The Fund is structured as an ETF and as a result is subject to special risks, including:

- **Not Individually Redeemable.** Shares are not individually redeemable to retail investors and may be redeemed only by the Fund and only to authorized participants at NAV in large blocks known as "Creation Units." An authorized participant may incur brokerage costs purchasing enough Shares to constitute a Creation Unit.
- **Trading Issues.** An active trading market for Shares may not be developed or maintained. Trading in Shares on the Cboe BZX Exchange, Inc. (the "Exchange") may be halted due to market conditions or for reasons that, in the view of the Exchange, make trading in Shares inadvisable, such as extraordinary market volatility.
- **Market Price Variance Risk.** The market prices of Shares will fluctuate in response to changes in NAV and supply and demand for Shares and will include a "bid-ask spread" charged by the exchange specialists, market makers or other participants that trade the particular security.
  - The market price of Shares may deviate from the Fund's NAV, particularly during times of market stress, with the result that investors may pay significantly more or significantly less for Shares than the Fund's NAV, which is reflected in the bid and ask price for Shares or in the closing price.

**Fixed-Income Risk.** When the Fund invests in fixed-income securities, the value of your investment in the Fund will fluctuate with changes in interest rates. Typically, a rise in interest rates causes a decline in the value of fixed-income securities owned by the Fund. In general, the market price of fixed income securities with longer maturities will increase or decrease more in response to changes in interest rates than shorter-term securities. Other risk factors include credit risk (the debtor may default), extension risk (an issuer may exercise its right to repay principal on a fixed rate obligation held by the Fund later than expected), and prepayment risk (the debtor may pay its obligation early, reducing the amount of interest payments).

**Interest Rate Risk.** Changing interest rates, including rates that fall below zero, may have unpredictable effects on markets, result in heightened market volatility and detract from the Fund's performance to the extent the Fund is exposed to such interest rates. An increase in interest rates will generally cause the value of securities held by the Fund to decline, may lead to heightened volatility in the fixed-income markets and may adversely affect the liquidity of certain fixed-income investments, including those held by the Fund.

**Issuer Risk.** The performance of the Fund depends on the performance of individual securities to which the Fund has exposure. Changes in the financial condition or credit rating of an issuer of those securities may cause the value of the securities to decline.

**Large Capitalization Company Risk.** The value of investments in larger companies may not rise as much as smaller companies, or larger companies may be unable to respond quickly to competitive challenges, such as changes in technology and consumer tastes.

**Limited History of Operations Risk.** The Fund has a limited history of operations for investors to evaluate.

**Market and Geopolitical Risk.** The increasing interconnectivity between global economies and financial markets increases the likelihood that events or conditions in one region or financial market may adversely impact issuers in a different country, region or financial market. Securities in the Fund's portfolio may underperform due to inflation (or expectations for inflation), interest rates, global demand for particular products or resources, natural disasters, climate-change and climate-related events, pandemics, epidemics, terrorism, regulatory events, tariffs and trade wars, and governmental or quasi-governmental actions. The occurrence of global events similar to those in recent years may result in market volatility and may have long term effects on the U.S. financial market.

**Small and Mid-Capitalization Companies Risk.** Investing in securities of small and mid-capitalization companies involves greater risk than is customarily associated with investing in larger, more established companies. These companies' securities may be more volatile and less liquid than those of more established companies, and may have returns that vary, sometimes significantly, from the overall securities market. Small and mid-capitalization companies tend to have inexperienced management as well as limited product and market diversification and financial resources. Small and mid-capitalization companies and the industries in which they focus are still evolving and, as a result, they may be more sensitive to changing market conditions.

**Passive Investment Risk.** The Fund is not actively managed and the Adviser will not sell a holding due to current or projected underperformance of a holding, industry or sector unless that holding is removed from the Index or selling the holding is otherwise required upon rebalancing of the Index as addressed in the Index methodology.

**Sector Exposure Risk.** The Fund may have significant exposure to a limited number of issuers conducting business in the same sector or group of sectors. Market conditions, interest rates, and economic, regulatory, or financial developments could significantly affect a single sector or a group of sectors, and the securities of companies in that sector or group of sectors could react similarly to these or other developments.

**Tracking Error Risk.** Tracking error is the divergence of the Fund's performance from that of the Index. Tracking error may occur because of an imperfect correlation between the Fund's holdings of portfolio securities and those in the Index, pricing difference, the Fund's holding of cash, difference in timing of the accrual of dividends, changes to the Index or the need to meet various regulatory requirements. This risk may be heightened during times of increased market volatility or other unusual market conditions. Tracking error also may result because the Fund incurs fees and expenses, while the Index does not.

**Turnover Risk.** A higher portfolio turnover will result in higher transactional and brokerage costs associated with the turnover, which may reduce the Fund's return, unless the securities traded can be bought and sold without corresponding commission costs. Frequent trading of securities may also increase the Fund's realized capital gains or losses, which may increase the taxes you pay as a Fund shareholder. The Fund is expected to have a high portfolio turnover rate.

**Underlying ETF Risk.** While the Underlying ETFs seek to provide certain investment outcomes, there is no guarantee that they will successfully do so. Because the Fund's value is based on the value of the Underlying ETFs, the Fund's investment performance largely depends on the investment performance and associated risks of the Underlying ETFs. The Underlying ETFs are subject to many of the same structural risks as the Fund that are described in more detail herein, such as ETF Structure Risk, Passive Investment Risk and Tracking Error Risk.

**Performance:** Because the Fund does not have a full calendar year of investment operations, no performance information is presented for the Fund at this time. In the future, performance information will be presented in this section of the Prospectus. Also, shareholder reports containing financial and performance information will be mailed to shareholders semi-annually. Updated performance information is available at no cost by visiting [www.monarchfunds.com](http://www.monarchfunds.com) or by calling toll-free at (541) 291-4405.

**Investment Adviser:** Kingsview Wealth Management, LLC

**Investment Sub-Adviser:** Penserra Capital Management LLC (“Penserra”)

**Portfolio Managers:** Dustin Lewellyn, CFA, Managing Director of Penserra; and Ernesto Tong, CFA, Managing Director of Penserra, have each served the Fund as its portfolio managers since it commenced operations. Christine Johanson, CFA, Director of Penserra, has served the Fund as a portfolio manager since August 2024.

**Purchase and Sale of Fund Shares:** Individual Shares may be purchased and sold in secondary market transactions through a broker dealer or at market price. Shares are listed for trading on the Exchange and trade at market prices rather than NAV. Shares may trade at a price that is greater than, at, or less than NAV. An investor may incur costs attributable to the difference between the highest price a buyer is willing to pay to purchase Shares (bid) and the lowest price a seller is willing to accept for Shares (ask) when buying or selling Shares in the second market (the “bid-ask spread”). Information on the Fund’s NAV, market price, premiums and discounts and bid-asks spreads is presented on the Fund’s website at [www.monarchfunds.com](http://www.monarchfunds.com).

**Tax Information:** The Fund’s distributions generally will be taxable as ordinary income or long-term capital gains. A sale of Shares may result in capital gain or loss.

**Payments to Broker-Dealers and Other Financial Intermediaries:** If you purchase the Fund through a broker-dealer or other financial intermediary (such as a bank), the Adviser or its related companies may pay the intermediary for the sale of Shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary’s website for more information.

## FUND SUMMARY – Monarch Volume Factor Global Unconstrained Index ETF

**Investment Objective:** The Monarch Volume Factor Global Unconstrained Index ETF (the “Fund”) seeks to replicate investment results that generally correspond, before fees and expenses, to the performance of the Monarch Volume Factor Global Unconstrained Index (the “Index”).

**Fees and Expenses of the Fund:** This table describes the fees and expenses that you may pay if you buy, hold and sell shares of the Fund. **You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the table and example below.**

<b>Annual Fund Operating Expenses</b> (expenses that you pay each year as a percentage of the value of your investment)	
Management Fees	0.85%
Distribution and Service (12b-1) Fees	0.00%
Other Expenses	0.29%
Acquired Fund Fees and Expenses <sup>(1)</sup>	0.28%
<b>Total Annual Fund Operating Expenses</b>	<b>1.42%</b>

(1) Acquired Fund Fees and Expenses are the indirect costs of investing in other investment companies. The operating expenses in this fee table will not correlate to the expense ratio in the Fund’s financial highlights because the financial statements include only the direct operating expenses incurred by the Fund.

**Example:** This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other funds.

The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and then sell all of your shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses remain the same. Although your actual costs may be higher or lower, based upon these assumptions your costs would be:

<u>1 Year</u>	<u>3 Years</u>	<u>5 Years</u>	<u>10 Years</u>
\$145	\$449	\$776	\$1,702

**Portfolio Turnover:** The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the Example, affect the Fund’s performance. During the fiscal period ended February 28, 2025, the Fund’s portfolio turnover rate was 367% of the average value of its portfolio.

**Principal Investment Strategies:** The Fund is a fund of funds that invests at least 80% of its total assets in the constituents of the Index. The Index uses a proprietary “Volume Factor” methodology to identify specific areas of the market with positive cash flow. The Index consists of up to 25 equally-weighted equity ETFs that demonstrate positive cash flow. When the cash flow trends are negative, a portion or all of the Index consists of one or more treasury ETFs.

Kingsview Wealth Management LLC (the “Adviser”) is the Index provider. The Index follows a proprietary rules-based methodology that screens the universe of U.S. listed equity ETFs with global exposure (including emerging markets) to select those funds that (i) use no leverage, (ii) are not inverse funds, (iii) have assets under management of at least \$50 million and (iv) have over two years of trading history. The Adviser then applies its proprietary “Volume Factor” ranking methodology to identify the areas of the market with positive cash flow. When cash flow trends are positive, the Index consists of ETFs that provide exposure to the areas and sectors of the market that are drawing the strongest cash flows. Based on these factors, the Fund at any given time may have a significant percentage of its assets invested in one or more sectors relative to other sectors. As of February 28, 2025, the Index was not allocated more than 25% to any one individual sector.

When cash flow trends are negative, as measured by trends in large-capitalization stocks and how many stocks are participating in a market decline, the Index consists of treasury ETFs.

The Adviser utilizes a sub-adviser, Penserra Capital Management LLC (the “Sub-Adviser”), to manage the assets of the Fund. The Sub-Adviser uses a replication indexing strategy to manage the Fund. “Replication indexing” is a strategy in which a fund invests in substantially all of the securities in its underlying index in approximately the same proportions as in the underlying index.

The Index is sponsored by Solactive A.G. (“Solactive”), which is independent of the Fund, the Adviser and the Sub-Adviser. Solactive calculates and publishes the market value of the Index based on the Index’s constituents. The Index is unmanaged and cannot be invested in directly.

**Principal Investment Risks:** *As with all funds, there is the risk that you could lose money through your investment in the Fund. Many factors affect the Fund’s net asset value (“NAV”) and performance.*

The following describes the risks the Fund bears with respect to its investments. As with any fund, there is no guarantee that the Fund will achieve its goal.

**Authorized Participant Risk.** Only an authorized participant may engage in creation or redemption transactions directly with the Fund. The Fund has a limited number of institutions that may act as authorized participants on an agency basis (*i.e.*, on behalf of other market participants). To the extent that authorized participants exit the business or are unable to proceed with creation or redemption orders with respect to the Fund and no other authorized participant is able to step forward to create or redeem Creation Units (as defined below), Fund shares (“Shares”) may be more likely to trade at a premium or discount to net asset value and possibly face trading halts or delisting. Authorized participant concentration risk may be heightened for ETFs that invest in non-U.S. securities or other securities or instruments that have lower trading volumes.

**Call Risk.** During periods of falling interest rates, an issuer of a callable bond held by the underlying ETFs may “call” or repay the security before its stated maturity, and the underlying ETF may have to reinvest the proceeds in securities with lower yields, which would result in a decline in the underlying ETF’s income, or in securities with greater risks or with other less favorable features.

**Credit Risk.** Debt issuers and other counterparties may be unable or unwilling to make timely interest and/or principal payments when due or otherwise honor their obligations. Changes in an issuer’s credit rating or the market’s perception of an issuer’s creditworthiness may also adversely affect the value of the underlying ETF’s investment in that issuer. The degree of credit risk depends on an issuer’s or counterparty’s financial condition and on the terms of an obligation.

**Early Close/Trading Halt Risk.** An exchange or market may close or impose a market trading halt or issue trading halts on specific securities, or the ability to buy or sell certain securities or financial instruments may be restricted, which may prevent the Fund from buying or selling certain securities or financial instruments. In these circumstances, the Fund may be unable to rebalance its portfolio, may be unable to accurately price its investments and may incur substantial trading losses.

**Emerging Market Risk.** Emerging market countries may have relatively unstable governments, weaker economies, and less-developed legal systems with fewer security holder rights. Emerging market economies may be based on only a few industries and security issuers may be more susceptible to economic weakness and more likely to default. Emerging market securities also tend to be less liquid.

**Equity Securities Risk.** Equity securities are susceptible to general stock market fluctuations and to volatile increases and decreases in value. The equity securities held by the Fund may experience sudden, unpredictable drops in value or long periods of decline in value. This may occur because of factors affecting securities markets generally, the equity securities of a particular sector, or a particular company.

**ETF Structure Risk.** The Fund is structured as an ETF and as a result is subject to special risks, including:

- **Not Individually Redeemable.** Shares are not individually redeemable to retail investors and may be redeemed only by the Fund and only to authorized participants at NAV in large blocks known as “Creation Units.” An authorized participant may incur brokerage costs purchasing enough Shares to constitute a Creation Unit.
- **Trading Issues.** An active trading market for Shares may not be developed or maintained. Trading in Shares on the Cboe BZX Exchange, Inc. (the “Exchange”) may be halted due to market conditions or for reasons that, in the view of the Exchange, make trading in Shares inadvisable, such as extraordinary market volatility.
- **Market Price Variance Risk.** The market prices of Shares will fluctuate in response to changes in NAV and supply and demand for Shares and will include a “bid-ask spread” charged by the exchange specialists, market makers or other participants that trade the particular security.
  - The market price of Shares may deviate from the Fund’s NAV, particularly during times of market stress, with the result that investors may pay significantly more or significantly less for Shares than the Fund’s NAV, which is reflected in the bid and ask price for Shares or in the closing price.

**Fixed-Income Risk.** When the Fund invests in fixed-income securities, the value of your investment in the Fund will fluctuate with changes in interest rates. Typically, a rise in interest rates causes a decline in the value of fixed income securities owned by the Fund. In general, the market price of fixed-income securities with longer maturities will increase or decrease more in response to changes in interest rates than shorter-term securities. Other risk factors include credit risk (the debtor may default), extension risk (an issuer may exercise its right to repay principal on a fixed rate obligation held by the Fund later than expected), and prepayment risk (the debtor may pay its obligation early, reducing the amount of interest payments).

**Foreign Risk.** The underlying ETFs' investment in foreign (non-U.S.) securities may result in the underlying ETF Fund experiencing more rapid and extreme changes in value than a fund that invests exclusively in securities of U.S. companies, due to smaller markets, differing reporting, accounting and auditing standards, and nationalization expropriation or confiscatory taxation, currency blockage, or political changes or diplomatic developments.

**Interest Rate Risk.** Changing interest rates, including rates that fall below zero, may have unpredictable effects on markets, result in heightened market volatility and detract from the Fund's performance to the extent the Fund is exposed to such interest rates. An increase in interest rates will generally cause the value of securities held by the Fund to decline, may lead to heightened volatility in the fixed-income markets and may adversely affect the liquidity of certain fixed-income investments, including those held by the Fund.

**Issuer Risk.** The performance of the Fund depends on the performance of individual securities to which the Fund has exposure. Changes in the financial condition or credit rating of an issuer of those securities may cause the value of the securities to decline.

**Limited History of Operations Risk.** The Fund has a limited history of operations for investors to evaluate.

**Market and Geopolitical Risk.** The increasing interconnectivity between global economies and financial markets increases the likelihood that events or conditions in one region or financial market may adversely impact issuers in a different country, region or financial market. Securities in the Fund's portfolio may underperform due to inflation (or expectations for inflation), interest rates, global demand for particular products or resources, natural disasters, climate-change and climate-related events, pandemics, epidemics, terrorism, regulatory events, tariffs and trade wars, and governmental or quasi-governmental actions. The occurrence of global events similar to those in recent years may result in market volatility and may have long term effects on the U.S. financial market.

**Passive Investment Risk.** The Fund is not actively managed and the Adviser will not sell a holding due to current or projected underperformance of a holding, industry or sector unless that holding is removed from the Index or selling the holding is otherwise required upon rebalancing of the Index as addressed in the Index methodology.

**Sector Exposure Risk.** The Fund may have significant exposure to a limited number of issuers conducting business in the same sector or group of sectors. Market conditions, interest rates, and economic, regulatory, or financial developments could significantly affect a single sector or a group of sectors, and the securities of companies in that sector or group of sectors could react similarly to these or other developments.

**Tracking Error Risk.** Tracking error is the divergence of the Fund's performance from that of the Index. Tracking error may occur because of an imperfect correlation between the Fund's holdings of portfolio securities and those in the Index, pricing difference, the Fund's holding of cash, difference in timing of the accrual of dividends, changes to the Index or the need to meet various regulatory requirements. This risk may be heightened during times of increased market volatility or other unusual market conditions. Tracking error also may result because the Fund incurs fees and expenses, while the Index does not.

**Turnover Risk.** A higher portfolio turnover will result in higher transactional and brokerage costs associated with the turnover, which may reduce the Fund's return, unless the securities traded can be bought and sold without corresponding commission costs. Frequent trading of securities may also increase the Fund's realized capital gains or losses, which may increase the taxes you pay as a Fund shareholder. The Fund is expected to have a high portfolio turnover rate.

**Underlying ETF Risk.** While the Underlying ETFs seek to provide certain investment outcomes, there is no guarantee that they will successfully do so. Because the Fund's value is based on the value of the Underlying ETFs, the Fund's investment performance largely depends on the investment performance and associated risks of the Underlying ETFs. The Underlying ETFs are subject to many of the same structural risks as the Fund that are described in more detail herein, such as ETF Structure Risk, Passive Investment Risk and Tracking Error Risk.

**U.S. Treasury Obligations Risk.** U.S. Treasury obligations held by the underlying ETFs may differ from other securities in their interest rates, maturities, times of issuance and other characteristics and may provide relatively lower returns than those of other securities. Similar to other issuers, changes to the financial condition or credit rating of the U.S. government may cause the value of the Fund's U.S. Treasury obligations to decline.

**Performance:** Because the Fund does not have a full calendar year of investment operations, no performance information is presented for the Fund at this time. In the future, performance information will be presented in this section of the Prospectus. Also, shareholder reports containing financial and performance information will be mailed to shareholders semi-annually. Updated performance information is available at no cost by visiting [www.monarchfunds.com](http://www.monarchfunds.com) or by calling toll free at (541) 291-4405.

**Investment Adviser:** Kingsview Wealth Management, LLC

**Investment Sub-Adviser:** Penserra Capital Management LLC (“Penserra”)

**Portfolio Managers:** Dustin Lewellyn, CFA, Managing Director of Penserra; and Ernesto Tong, CFA, Managing Director of Penserra, have each served the Fund as its portfolio managers since it commenced operations. Christine Johanson, CFA, Director of Penserra, has served the Fund as a portfolio manager since August 2024.

**Purchase and Sale of Fund Shares:** Individual Shares may be purchased and sold in secondary market transactions through a broker dealer or at market price. Shares are listed for trading on the Exchange and trade at market prices rather than NAV. Shares may trade at a price that is greater than, at, or less than NAV. An investor may incur costs attributable to the difference between the highest price a buyer is willing to pay to purchase Shares (bid) and the lowest price a seller is willing to accept for Shares (ask) when buying or selling Shares in the second market (the “bid-ask spread”). Information on the Fund’s NAV, market price, premiums and discounts and bid-asks spreads is presented on the Fund’s website at [www.monarchfunds.com](http://www.monarchfunds.com).

**Tax Information:** The Fund’s distributions generally will be taxable as ordinary income or long-term capital gains. A sale of Shares may result in capital gain or loss.

**Payments to Broker-Dealers and Other Financial Intermediaries:** If you purchase the Fund through a broker-dealer or other financial intermediary (such as a bank), the Adviser or its related companies may pay the intermediary for the sale of Shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary’s website for more information.

## ADDITIONAL INFORMATION ABOUT PRINCIPAL INVESTMENT STRATEGIES AND RELATED RISKS

### INVESTMENT OBJECTIVE:

Fund	Investment Objective
Monarch Ambassador Income Index ETF ("Ambassador Income Index ETF")	seeks to replicate investment results that generally correspond, before fees and expenses, to the performance of the Monarch Ambassador Income Index
Monarch Blue Chips Core Index ETF ("Blue Chips Core Index ETF")	seeks to replicate investment results that generally correspond, before fees and expenses, to the performance of the Monarch Blue Chips Core Index
Monarch Dividend Plus Index ETF ("Dividend Plus ETF")	seeks to replicate investment results that generally correspond, before fees and expenses, to the performance of the Monarch Dividend Plus Index
Monarch ProCap Index ETF ("ProCap Index ETF")	seeks to replicate investment results that generally correspond, before fees and expenses, to the performance of the Monarch ProCap Index
Monarch Select Subsector Index ETF ("Select Subsector ETF")	seeks to replicate investment results that generally correspond, before fees and expenses, to the performance of the Monarch Select Subsector Index
Monarch Volume Factor Dividend Tree Index ETF ("Volume Factor Dividend Tree ETF")	seeks to replicate investment results that generally correspond, before fees and expenses, to the performance of the Monarch Volume Factor Dividend Tree Index
Monarch Volume Factor Global Unconstrained Index ETF ("Volume Factor Global Unconstrained ETF")	seeks to replicate investment results that generally correspond, before fees and expenses, to the performance of Monarch Volume Factor Global Unconstrained Index.

Each Fund's investment objective may be changed by the Board of Trustees upon 60 days' written notice to shareholders. Each Fund has adopted a policy to invest at least 80% of its assets in a particular type of security. Each Fund may change its 80% policy upon 60 days' written notice to its shareholders.

### PRINCIPAL INVESTMENT STRATEGIES:

#### Ambassador Income Index ETF

The Ambassador Income Index ETF is designed to track the Monarch Ambassador Income Index (the "Ambassador Income Index"). The Ambassador Income Index is designed to measure the performance of an investable universe of fixed-income securities of varying credit quality and duration, including corporate bonds, lower-quality bonds, known as "high yield" or "junk" bonds, treasury bonds, municipal bonds, mortgage-backed securities and convertible bonds, that provide broad exposure to the U.S. and global bond market. The Ambassador Income Index methodology involves a proprietary algorithm that incorporates levels and growth rates of non-farm payroll data to estimate which of six economic states reflects the current phase of the economic cycle. Economic states range from Robust Expansion to Severe Contraction. Based on the estimated economic state, the Ambassador Income Index can shift from a portfolio more aligned with the aggregate bond universe to allocations that are more aggressive with respect to portfolio components such as high yield and alternatives at economic cycle turning points (i.e., Severe Contraction or Robust Expansion). Both the Ambassador Income Index and the Fund's portfolio are updated monthly as new employment data are released.

The Adviser creates and maintains the Ambassador Income Index by following a proprietary rules-based methodology that selects fixed-income sectors based on the phase of the current economic cycle (i.e., expansion, peak, contraction, trough). The Ambassador Income Index takes into account macroeconomic data about employment trends to determine the phase of the economic cycle and its relative strength to determine the portfolio allocations that are best suited for the particular phase.

## Blue Chips Core Index ETF

The Blue Chips Core Index ETF is designed to track the Monarch Blue Chips Core Index (the “Blue Chips Core Index”). The Blue Chips Core Index aims to rank U.S. large capitalization companies included in the S&P 500 Index. The Blue Chips Core Index methodology involves fundamental metrics including, but not limited to, revenue, revenue growth, profit margin, profit margin growth, net income, net income growth and price to earnings ratios. Companies are assigned a rank for each metric. A proprietary weighting algorithm is then applied to achieve an overall score for each company. The underlying portfolio is then constructed from the top 24 names typically in an equally weighted fashion. Based on this approach, the Fund at any given time may have a significant percentage of its assets invested in one or more sectors relative to other sectors. The Blue Chips Core Index and the Fund’s portfolio are updated quarterly as the core fundamental metrics are released. As of February 28, 2025, the Blue Chips Core Index had over 25% exposure to the technology sector.

## Dividend Plus ETF

The Dividend Plus ETF invests at least 80% of its total assets in the constituents of the Monarch Dividend Plus Index (the “Dividend Plus Index”). The Dividend Plus Index consists of 30 equally weighted U.S. stocks from the Russell 1000 Index that represent all economic sectors within the S&P 500 Index and that represent dividend paying value stocks that deliver dividend cash flows across all market cycles.

Kingsview Wealth Management LLC (the “Adviser”) is the index provider. The Dividend Plus Index follows a proprietary rules-based methodology that initially screens the companies listed on the Russell 1000, an index that represents the top 1000 companies by market capitalization, for both absolute and relative dividend growth and free cash flow generation metrics to determine its composition. The Dividend Plus Index methodology assigns a composite score for each company based on its rankings for its potential to generate positive cash flow (as measured by its free cash flow-to-enterprise value ratio), debt-to-equity ratio, payout ratio, dividend growth and earnings stability. The 30 highest scoring companies are selected for the Dividend Plus Index. These companies are expected to provide dividend income “plus” strong capital appreciation. The Dividend Plus Index is reconstituted weekly. Any constituent that exceeds its target valuation (as calculated by its price-to-earnings ratio, return on equity, dividend payout ratio, and sales growth) is removed from the Dividend Plus Index and new constituents are added in rank order to restore the Dividend Plus Index to 30 constituents. Constituents that are removed from the Index are eligible for inclusion in the Index at the next reconstitution. Based on these factors, the Fund at any given time may have a significant percentage of its assets invested in one or more sectors relative to other sectors. As of February 28, 2025, the Dividend Plus Index had over 25% exposure to the consumer staples sector.

The Adviser utilizes a sub-adviser, Penserra Capital Management LLC (the “Sub-Adviser”), to manage the assets of each Fund. The Sub-Adviser uses a replication indexing strategy to manage the Fund. “Replication indexing” is a strategy in which a fund invests in substantially all of the securities in its underlying index in approximately the same proportions as in the underlying index.

The Dividend Plus Index is sponsored by Solactive A.G. (“Solactive”), which is independent of the Fund, the Adviser and the Sub-Adviser. Solactive calculates and publishes the market value of the Dividend Plus Index based on the Index’s constituents. The Dividend Plus Index is unmanaged and cannot be invested in directly.

## ProCap Index ETF

The ProCap Index ETF is designed to track the Monarch ProCap Index (the ProCap Index”). The ProCap Index consists of fixed income and equity ETFs that provide broad exposure to the U.S. and global bond market and to the S&P Global Industry Classification Standard (“GICS”) sectors. The ProCap Index may also include an alternative sleeve of instruments that could range from currency ETFs to commodity ETFs, with a typical allocation being 10% when the sleeve is utilized. The ProCap Index methodology involves a proprietary algorithm that incorporates levels and growth rates of non-farm payroll data to estimate which of six states reflects the current phase of the economic cycle. Phases of the economic cycle range from “robust expansion” to “severe contraction”. Based on the anticipated phase of the economic cycle, the ProCap Index can shift from a balanced portfolio, which is the typical allocation in more the normal economic states, to allocations that are more or less aggressive with respect to equity and alternatives exposure at economic cycle turning points. Both the ProCap Index and the Fund’s portfolio are updated monthly as new employment data are released.

The ProCap Index is comprised of 6-9 constituents, with fixed income and equity allocations each being at least 15% and no more than 75% of the ProCap Index.

## Select Subsector ETF

The Select Subsector ETF is a fund of funds that invests at least 80% of its total assets in the constituents of the Monarch Select Subsector Index (the “Select Subsector Index”). The Select Subsector Index consists of 10 equally-weighted U.S. listed ETFs of any market capitalization that represent economically advantageous U.S. sectors and subsectors.

The Adviser is the index provider. The Select Subsector Index follows a proprietary rules-based methodology that selects which equity sectors and subsectors to invest in based on the phase of the economic cycle. The methodology uses employment trends to determine the phase of the economic cycle and identifies the sectors and subsectors that have historically performed well during such cycle. The methodology selects ETFs that are expected to deliver the best risk adjusted return for the identified phase. Because the Fund may hold subsector ETFs from the same sector, the Fund at any given time may have a significant percentage of its assets invested in one or more sectors relative to other sectors. As of February 28, 2025, the Index had over 25% exposure to the healthcare sector.

The Adviser utilizes the Sub-Adviser to manage the assets of the Fund. The Sub-Adviser uses a replication indexing strategy to manage the Fund. "Replication indexing" is a strategy in which a fund invests in substantially all of the securities in its underlying index in approximately the same proportions as in the underlying index.

The Select Subsector Index is sponsored by Solactive, which is independent of the Fund, the Adviser and the Sub-Adviser. Solactive calculates and publishes the market value of the Select Subsector Index based on the Index's constituents. The Select Subsector Index is unmanaged and cannot be invested in directly.

#### Volume Factor Dividend Tree ETF

The Volume Factor Dividend Tree ETF invests at least 80% of its total assets in the constituents of the Monarch Volume Factor Dividend Tree Index (the "Volume Factor Dividend Tree Index"). The Volume Factor Dividend Tree Index uses proprietary "Volume Factor" methodology to identify specific areas of the market with positive cash flow. The Volume Factor Dividend Tree Index consists of 40 equally-weighted individual stocks that demonstrate positive cash flow and an ability to pay dividends, and up to 5 fixed income ETFs if the cash flow trend is negative. Only ETFs that provide exposure to short-term U.S. treasury securities are eligible for the Index.

The Adviser is the index provider. The Volume Factor Dividend Tree Index follows a proprietary rules-based methodology that screens 3,000 equities from the Russell 3000 of U.S. origin or exposure to identify stocks with potential for positive cash flow and dividend growth. The Index uses a proprietary "Volume Factor" ranking to generate a composite score for each stock based on its capital-weighted volume, price, and the relationship between trading volume and price as measured by the proprietary "Volume Price Confirmation Indicator." The 40 highest scoring stocks are selected for the Volume Factor Dividend Tree Index when capital flow trends are positive. The Volume Factor Dividend Tree Index is reconstituted quarterly. Based on these factors, the Fund at any given time may have a significant percentage of its assets invested in one or more sectors relative to other sectors. As of February 28, 2025, the Volume Factor Dividend Tree Index was not allocated more than 25% to any one sector.

When capital flow trends are negative, the Volume Factor Dividend Tree Index reduces its exposure to equities and increases its exposure to fixed income ETFs up to 50% of the Volume Factor Dividend Tree Index.

The Adviser utilizes the Sub-Adviser to manage the assets of the Fund. The Sub-Adviser uses a replication indexing strategy to manage the Fund. "Replication indexing" is a strategy in which a fund invests in substantially all of the securities in its underlying index in approximately the same proportions as in the underlying index.

The Volume Factor Dividend Tree Index is sponsored by Solactive, which is independent of the Fund, the Adviser and the Sub-Adviser. Solactive calculates and publishes the market value of the Volume Factor Dividend Tree Index based on the Index's constituents. The Volume Factor Dividend Tree Index is unmanaged and cannot be invested in directly.

#### Volume Factor Global Unconstrained ETF

The Volume Factor Global Unconstrained ETF is a fund of funds that invests at least 80% of its total assets in the constituents of the Monarch Volume Factor Global Unconstrained Index (the "Volume Factor Global Unconstrained Index."). The Volume Factor Global Unconstrained Index uses a proprietary "Volume Factor" methodology to identify specific areas of the market with positive cash flow. The Volume Factor Global Unconstrained Index consists of up to 25 equally-weighted equity ETFs that demonstrate positive cash flow. When cash flow trends are negative, a portion or all of the Volume Factor Global Unconstrained Index is allocated to one or more treasury ETFs.

The Adviser is the index provider. The Volume Factor Global Unconstrained Index follows a proprietary rules-based methodology that screens the universe of U.S. listed equity ETFs with global exposure (including emerging markets) to select those funds that (i) use no leverage, (ii) are not inverse funds, (iii) have assets under management of at least \$50 million and (iv) have over two years of trading history. The Adviser then applies its proprietary "Volume Factor" ranking methodology to identify the areas of the market with positive cash flow. When cash flow trends are positive, the Index consists of ETFs that provide exposure to the areas and sectors of the market that are drawing the strongest cash flows. Based on these factors, the Fund at any given time may have a significant percentage of its assets invested in one or more sectors relative to other sectors. As of February 28, the Volume Factor Global Unconstrained Index was not allocated more than 25% to any one individual sector.

When cash flow trends are negative, as measured by trends in large-capitalization stocks and by how many stocks are participating in a market decline, the Volume Factor Global Unconstrained Index consists of treasury ETFs.

The Adviser utilizes the Sub-Adviser to manage the assets of the Fund. The Sub-Adviser uses a replication indexing strategy to manage the Fund. “Replication indexing” is a strategy in which a fund invests in substantially all of the securities in its underlying index in approximately the same proportions as in the underlying index.

The Volume Factor Global Unconstrained Index is sponsored by Solactive, which is independent of the Fund, the Adviser and the Sub-Adviser. Solactive calculates and publishes the market value of the Volume Factor Global Unconstrained Index based on the Index’s constituents. The Volume Factor Global Unconstrained Index is unmanaged and cannot be invested in directly.

**PRINCIPAL INVESTMENT RISKS:**

Underlying ETF Risk	•			•	•	•	•
U.S. Treasury Obligations Risk	•						•
Value Risk			•				

**Authorized Participant Risk.** Only an authorized participant may engage in creation or redemption transactions directly with the Fund. The Fund has a limited number of institutions that may act as authorized participants on an agency basis (*i.e.*, on behalf of other market participants). To the extent that authorized participants exit the business or are unable to proceed with creation or redemption orders with respect to the Fund and no other authorized participant is able to step forward to create or redeem Creation Units, Fund shares may be more likely to trade at a premium or discount to net asset value and possibly face trading halts or delisting.

**Call Risk.** During periods of falling interest rates, an issuer of a callable bond held by an underlying ETF may “call” or repay the security before its stated maturity, and the underlying ETF may have to reinvest the proceeds in securities with lower yields, which would result in a decline in the underlying ETF’s income, or in securities with greater risks or with other less favorable features.

**Commodities Risk.** The Fund’s exposure to the commodities markets may subject the Fund to greater volatility than investments in traditional securities. The value of commodity-linked derivative instruments, commodity-based exchange traded trusts and commodity-based exchange traded funds and notes may be affected by changes in overall market movements, commodity index volatility, changes in interest rates, or sectors affecting a particular industry or commodity, such as drought, floods, weather, livestock disease, embargoes, tariffs, and international economic, political and regulatory developments.

**Convertible Bond Risk.** Convertible bonds are hybrid securities that have characteristics of both bonds and common stocks and are subject to fixed income security risks and conversion value-related equity risk. Convertible bonds are similar to other fixed-income securities because they usually pay a fixed interest rate and are obligated to repay principal on a given date in the future. The market value of fixed-income securities tends to decline as interest rates increase. Convertible bonds are particularly sensitive to changes in interest rates when their conversion to equity feature is small relative to the interest and principal value of the bond. Convertible issuers may not be able to make principal and interest payments on the bond as they become due. Convertible bonds may also be subject to prepayment or redemption risk.

**Credit Risk.** Debt issuers and other counterparties may be unable or unwilling to make timely interest and/or principal payments when due or otherwise honor their obligations. Changes in an issuer’s credit rating or the market’s perception of an issuer’s creditworthiness may also adversely affect the value of the underlying ETF’s investment in that issuer. The degree of credit risk depends on an issuer’s or counterparty’s financial condition and on the terms of an obligation.

**Currency Risk.** The Fund’s investments in securities that trade in, and receive revenues in, foreign currencies, are subject to the risk that those currencies will decline in value relative to the U.S. dollar, or, in the case of hedging positions, that the U.S. dollar will decline in value relative to the currency being hedged. As a result, the Fund’s investments in foreign currency-denominated securities may reduce the Fund’s returns.

**Dividend-Paying Stock Risk.** While the Fund intends to hold stocks of companies directly or through ETFs of companies that have historically paid a high dividend yield, those companies may reduce or discontinue their dividends, reducing the yield of the Fund. Low priced stocks in the Fund may be more susceptible to these risks. Past dividend payments are not a guarantee of future dividend payments. Also, the market return of high dividend yield stocks, in certain market conditions, may perform worse than other investment strategies or the overall stock market. The Fund’s emphasis on dividend-paying stocks involves the risk that such stocks may fall out of favor with investors and underperform the market. Also, a company may reduce or eliminate its dividend.

**Early Close/Trading Halt Risk.** An exchange or market may close or impose a market trading halt or issue trading halts on specific securities, or the ability to buy or sell certain securities or financial instruments may be restricted, which may prevent the Fund from buying or selling certain securities or financial instruments. In these circumstances, the Fund may be unable to rebalance its portfolio, may be unable to accurately price its investments and may incur substantial trading losses.

**Emerging Market Risk.** Emerging market countries may have relatively unstable governments, weaker economies, and less-developed legal systems with fewer security holder rights. Emerging market economies may be based on only a few industries and security issuers may be more susceptible to economic weakness and more likely to default. Emerging market securities also tend to be less liquid.

**Equity Securities Risk.** Fluctuations in the value of equity securities held by the Fund will cause the net asset value (“NAV”) of the Fund and the price of its shares (“Shares”) to fluctuate.

- **Common Stock Risk.** Common stock of an issuer in the Fund’s portfolio may decline in price if the issuer fails to make anticipated dividend payments. Common stock will be subject to greater dividend risk than preferred stocks or debt instruments of the same issuer. In addition, common stocks have experienced significantly more volatility in returns than other asset classes.

- **Preferred Stock Risk.** Generally, preferred stockholders (such as the Fund) have no voting rights with respect to the issuing company unless certain events occur. In addition, preferred stock will be subject to greater credit risk than debt instruments of an issuer, and could be subject to interest rate risk like fixed income securities, as described below. An issuer's board of directors is generally not under any obligation to pay a dividend (even if dividends have accrued), and may suspend payment of dividends on preferred stock at any time. There is also a risk that the issuer of any of the Fund's holdings will default and fail to make scheduled dividend payments on the preferred stock held by the Fund.

**ETF Structure Risk.** The Fund is structured as an ETF and as a result is subject to the special risks, including:

- **Not Individually Redeemable.** Shares are not redeemable by retail investors and may be redeemed only by authorized participants at NAV and only in Creation Units. A retail investor generally incurs brokerage costs when selling shares.
- **Trading Issues.** Trading in Shares on the Exchange may be halted due to market conditions or for reasons that, in the view of the Exchange, make trading in Shares inadvisable, such as extraordinary market volatility. There can be no assurance that Shares will continue to meet the listing requirements of the Exchange, which may result in the trading of Shares being suspended or Shares being delisted. An active trading market for Shares may not be developed or maintained. If Shares are traded outside a collateralized settlement system, the number of financial institutions that can act as authorized participants that can post collateral on an agency basis is limited, which may limit the market for Shares and lead to a difference in the market price of Shares and their underlying value.
- **Market Price Variance Risk.** Individual Shares that are listed for trading on the Exchange can be bought and sold in the secondary market at market prices. The market prices of Shares will fluctuate in response to changes in NAV and supply and demand for Shares. There may be times when the market price and the NAV vary significantly and you may pay more than NAV when buying Shares on the secondary market, and you may receive less than NAV when you sell those Shares. The market price of Shares, like the price of any exchange traded security, includes a "bid-ask spread" charged by the exchange specialists, market makers or other participants that trade the particular security. In times of severe market disruption, the bid-ask spread often increases significantly. This means that Shares may trade at a discount to NAV and the discount is likely to be greatest when the price of Shares is falling fastest, which may be the time that you most want to sell your Shares. The Fund's investment results are measured based upon the daily NAV of the Fund over a period of time. Investors purchasing and selling Shares in the secondary market may not experience investment results consistent with those experienced by those authorized participants creating and redeeming directly with the Fund.
  - In times of market stress, market makers may step away from their role market making Shares and in executing trades, which can lead to differences between the market value of Shares and the Fund's NAV.
  - The market price for Shares may deviate from the Fund's NAV, particularly during times of market stress, with the result that investors may pay significantly more or significantly less for Shares than the Fund's NAV, which is reflected in the bid and ask price for Shares or in the closing price.
  - When all or a portion of the Fund's underlying securities trade in a market that is closed when the market for Shares is open, there may be changes from the last quote of the closed market and the quote from the Fund's domestic trading day, which could lead to differences between the market value of Shares and the Fund's NAV.
  - In stressed market conditions, the market for Shares may become less liquid in response to the deteriorating liquidity of the Fund's portfolio. This adverse effect on the liquidity of Shares may, in turn, lead to differences between the market value of Shares and the Fund's NAV.

**Extension Risk.** During periods of rising interest rates, certain debt obligations may be paid off substantially more slowly than originally anticipated and the value of those securities may fall sharply, resulting in a decline in the Fund's income and potentially in the value of the Fund's investments.

**Fixed-Income Risk.** When the Fund invests in fixed income securities, the value of your investment in the Fund will fluctuate with changes in interest rates. Typically, a rise in interest rates causes a decline in the value of fixed-income securities owned by the Fund. In general, the market price of fixed income securities with longer maturities will increase or decrease more in response to changes in interest rates than shorter-term securities. Other risk factors include credit risk (the debtor may default), extension risk (an issuer may exercise its right to repay principal on a fixed rate obligation held by the Fund later than expected), and prepayment risk (the debtor may pay its obligation early, reducing the amount of interest payments). These risks could affect the value of a particular investment by the Fund, possibly causing the Fund's share price and total return to be reduced and fluctuate more than other types of investments. A rise in interest rates in turn may result in a decline in the value of the bond investments held by the Fund.

**Foreign Risk.** An underlying ETF's investment in foreign (non-U.S.) securities may result in the underlying ETF experiencing more rapid and extreme changes in value than a fund that invests exclusively in securities of U.S. companies, due to smaller markets, differing reporting, accounting and auditing standards, and nationalization expropriation or confiscatory taxation, currency blockage, or political changes or diplomatic developments.

**High-Yield Risk.** Lower-quality bonds, known as "high yield" or "junk" bonds, present greater risk than bonds of higher quality, including an increased risk of default. An economic downturn or period of rising interest rates could adversely affect the market for these bonds and reduce the Fund's ability to sell its bonds. The lack of a liquid market for these bonds could decrease the Fund's share price.

**Income Risk.** The Fund's income may decline if interest rates fall. This decline in income can occur because the Fund may subsequently invest in lower yielding bonds as bonds in its portfolio mature, are near maturity or are called, bonds in the Underlying Index are substituted, or the Fund otherwise needs to purchase additional bonds.

**Interest Rate Risk.** Changing interest rates may have unpredictable effects on markets, result in heightened market volatility and detract from the Fund's performance to the extent the Fund is exposed to such interest rates. An increase in interest rates will generally cause the value of securities held by the Fund to decline, may lead to heightened volatility in the fixed-income markets and may adversely affect the liquidity of certain fixed-income investments, including those held by the Fund.

**Issuer Risk.** The performance of the Fund depends on the performance of individual securities to which the Fund has exposure. Changes in the financial condition or credit rating of an issuer of those securities may cause the value of the securities to decline.

**Large Capitalization Company Risk.** The value of investments in larger companies may not rise as much as smaller companies, or larger companies may be unable to respond quickly to competitive challenges, such as changes in technology and consumer tastes.

**Limited History of Operations Risk.** The Fund has a limited history of operations for investors to evaluate.

**Market and Geopolitical Risk.** The increasing interconnectivity between global economies and financial markets increases the likelihood that events or conditions in one region or financial market may adversely impact issuers in a different country, region or financial market. Securities in the Fund's portfolio may underperform due to inflation (or expectations for inflation), interest rates, global demand for particular products or resources, natural disasters, climate-change and climate-related events, pandemics, epidemics, terrorism, regulatory events, tariffs and trade wars, and governmental or quasi-governmental actions. The occurrence of global events similar to those in recent years, such as terrorist attacks around the world, natural disasters, social and political discord or debt crises and downgrades, among others, may result in market volatility and may have long term effects on the U.S. financial market. It is difficult to predict when similar events affecting the U.S. financial market may occur, the effects that such events may have and the duration of those effects. Any such event(s) could have a significant adverse impact on the value and risk profile of the Fund's portfolio. The COVID-19 global pandemic, for example, had negative impacts, and in many cases severe negative impacts, on the U.S. financial market. It is not known how long the of significant events described above would last, but there could be a prolonged period of global economic slowdown, which may impact your Fund investment. Therefore, the Fund could lose money over short periods due to short-term market movements and over longer periods during more prolonged market downturns. During a general market downturn, multiple asset classes may be negatively affected. Changes in market conditions and interest rates can have the same impact on all types of securities and instruments. In times of severe market disruptions you could lose your entire investment.

**Mortgage-Backed Securities Risk.** The Fund invests in MBS issued or guaranteed by the U.S. government or one of its agencies or sponsored entities, some of which may not be backed by the full faith and credit of the U.S. government. MBS represent interests in "pools" of mortgages and are subject to interest rate, prepayment, and extension risk. MBS react differently to changes in interest rates than other bonds, and the prices of MBS may reflect adverse economic and market conditions. Small movements in interest rates (both increases and decreases) may quickly and significantly reduce the value of certain MBS. MBS are also subject to the risk of default on the underlying mortgage loans, particularly during periods of economic downturn. Default or bankruptcy of a counterparty to a to-be-announced ("TBA") transaction would expose the Fund to possible losses.

**Passive Investment Risk.** The Fund is not actively managed and the Adviser will not sell a holding due to current or projected underperformance of a holding, industry or sector unless that holding is removed from the Index or selling the holding is otherwise required upon rebalancing of the Index as addressed in the Index methodology.

**Portfolio Turnover Risk.** A higher portfolio turnover will result in higher transactional and brokerage costs and may result in higher taxes when Shares are held in a taxable account. A high portfolio turnover may reduce the Fund's return, unless the securities traded can be bought and sold without corresponding commission costs. Frequent trading of securities may also increase the Fund's realized capital gains or losses, which may increase the taxes you pay as a Fund shareholder. The Fund is expected to have a high portfolio turnover rate.

*Prepayment Risk.* During periods of falling interest rates, issuers of certain debt obligations may repay principal prior to the security's maturity, which may cause the Fund to have to reinvest in securities with lower yields or higher risk of default, resulting in a decline in the Fund's income or return potential.

*Sector Exposure Risk.* The Fund may have significant exposure to a limited number of issuers conducting business in the same sector or group of sectors (and, where applicable, subsectors). Market conditions, interest rates, and economic, regulatory, or financial developments could significantly affect a single sector or a group of sectors, and the securities of companies in that sector or group of sectors could react similarly to these or other developments.

- *Consumer Staples Sector Risk (Dividend Plus ETF).* The consumer staples sector may be affected by the regulation of various product components and production methods, marketing campaigns and other factors affecting consumer demand.
- *Healthcare Sector Risk (Select Subsector ETF only).* The healthcare sector is subject to government regulation and reimbursement rates, as well as government approval of products and services, which could have a significant effect on price and availability, and can be significantly affected by product liability claims, rapid obsolescence, and patent expirations.
- *Technology Sector Risk (Blue Chips Core Index ETF only).* The Fund may have significant exposure to the technology sector, and therefore the performance of the Fund could be negatively impacted by events affecting this sector. The value of stocks of technology companies and companies that rely heavily on technology are particularly vulnerable to rapid changes in technology product cycles, rapid product obsolescence, government regulation and competition, both domestically and internationally, including competition from foreign competitors with lower production costs. Stocks of technology companies and companies that rely heavily on technology, especially those of smaller, less-seasoned companies, tend to be more volatile than the overall market. Technology companies are heavily dependent on patent and intellectual property rights, the loss or impairment of which may adversely affect profitability. Additionally, technology companies may face dramatic and often unpredictable changes in growth rates and competition. Market or economic factors impacting technology companies and companies that rely heavily on technological advances could have a significant effect on the value of the Fund's investments.

*Small and Mid-Capitalization Companies Risk.* Investing in securities of small and mid-capitalization companies involves greater risk than customarily is associated with investing in larger, more established companies. These companies' securities may be more volatile and less liquid than those of more established companies, and may have returns that vary, sometimes significantly, from the overall securities market. Small and mid-capitalization companies tend to have inexperienced management as well as limited product and market diversification and financial resources. Small and mid-capitalization companies and the industries in which they focus are still evolving and, as a result, they may be more sensitive to changing market conditions.

*Tracking Error Risk.* Tracking error is the divergence of the Fund's performance from that of the Index. Tracking error may occur because of an imperfect correlation between the Fund's holdings of portfolio securities and those in the Index, pricing difference, the Fund's holding of cash, difference in timing of the accrual of dividends, changes to the Index or the need to meet various regulatory requirements. This risk may be heightened during times of increased market volatility or other unusual market conditions. Tracking error also may result because the Fund incurs fees and expenses, while the Index does not.

*Underlying ETF Risk.* While the Underlying ETFs seek to provide certain investment outcomes, there is no guarantee that they will successfully do so. Because the Fund's value is based on the value of the Underlying ETF's, the Fund's investment performance largely depends on the investment performance and associated risks of the Underlying ETFs. The Underlying ETFs are subject to many of the same structural risks as the Fund that are described in more detail herein, such as ETF Structure Risk, Passive Investment Risk and Tracking Error Risk.

*U.S. Treasury Obligations Risk.* U.S. Treasury obligations held by the underlying ETFs may differ from other securities in their interest rates, maturities, times of issuance and other characteristics and may provide relatively lower returns than those of other securities. Similar to other issuers, changes to the financial condition or credit rating of the U.S. government may cause the value of the Fund's U.S. Treasury obligations to decline.

*Value Risk.* A company may be undervalued due to market or economic conditions, temporary earnings declines, unfavorable developments affecting the company and other factors. Securities purchased by a Fund that do not realize their full economic value may reduce the Fund's return.

**PORTFOLIO HOLDINGS DISCLOSURE:** Each Fund's portfolio holdings are disclosed each day on its website at [www.monarchfunds.com](http://www.monarchfunds.com). A description of the Funds' policies and procedures regarding the release of portfolio holdings information is available in the Funds' Statement of Additional Information ("SAI").

**OPERATIONAL AND CYBERSECURITY RISK:** Fund operations, including business, financial, accounting, data processing systems or other operating systems and facilities may be disrupted, disabled or damaged as a result of a number of factors, including events that are wholly or partially beyond the Funds' control. For example, there could be electrical or telecommunications outages; degradation or loss of internet or web services; natural disasters, such as earthquakes, tornados and hurricanes; disease pandemics; or events arising from local or larger scale political or social events, as well as terrorist acts.

The Funds are also subject to the risk of potential cyber incidents, which may include, but are not limited to, the harming of or unauthorized access to digital systems (for example, through "hacking" or infection by computer viruses or other malicious software code), denial-of-service attacks on websites, and the inadvertent or intentional release of confidential or proprietary information. Cyber incidents may, among other things, harm Fund operations, result in financial losses to the Funds and their shareholders, cause the release of confidential or highly restricted information, and result in regulatory penalties, reputational damage, and/or increased compliance, reimbursement or other compensation costs. Fund operations that may be disrupted or halted due to a cyber incident include trading, the processing of shareholder transactions, and the calculation of a Fund's net asset value.

Issues affecting operating systems and facilities through cyber incidents, any of the scenarios described above, or other factors, may harm the Funds by affecting the Adviser, or other service providers, or issuers of securities in which the Funds invest. Although the Funds have business continuity plans and other safeguards in place, including what the Funds believe to be robust information security procedures and controls, there is no guarantee that these measures will prevent cyber incidents or prevent or ameliorate the effects of significant and widespread disruption to our physical infrastructure or operating systems. Furthermore, the Funds cannot directly control the security or other measures taken by unaffiliated service providers or the issuers of securities in which the Funds invest. Such risks at issuers of securities in which the Funds invest could result in material adverse consequences for such issuers and may cause a Fund's investment in such securities to lose value.

## MANAGEMENT

---

**INVESTMENT ADVISER:** Kingsview Wealth Management LLC, located at 509 SE 7<sup>th</sup> Street, 2<sup>nd</sup> Floor, Grants Pass, OR 97526, serves as each Fund's investment adviser. The Adviser is registered with the SEC as an investment adviser under the Investment Advisers Act of 1940, as amended. The Adviser manages accounts for individuals and institutions as well as the Funds. As of February 28, 2025, the Adviser had approximately \$7.0 billion in assets under management.

Subject to the oversight of the Board of Trustees, the Adviser is responsible for overseeing the management of the Funds' investments and providing certain administrative services and facilities under an advisory agreement between the Funds and the Adviser (the "Investment Advisory Agreement").

The management fee set forth in the Investment Advisory Agreement is 0.85% of each Fund's average daily net assets, annually to be paid on a monthly basis. In addition to investment advisory fees, each Fund pays other expenses including costs incurred in connection with the maintenance of securities law registration, printing and mailing prospectuses and statements of additional information to shareholders, certain financial accounting services, taxes or governmental fees, custodial, transfer and shareholder servicing agent costs, expenses of outside counsel and independent accountants, preparation of shareholder reports and expenses of trustee and shareholders meetings.

The Adviser has contractually agreed to waive its fees and reimburse expenses of each Fund, at least until June 30, 2026, to ensure that Total Annual Fund Operating Expenses After Fee Waiver and Reimbursement excluding: (i) any front-end or contingent deferred loads; (ii) brokerage fees and commissions; (iii) acquired fund fees and expenses; (iv) fees and expenses associated with investments in other collective investment vehicles or derivative instruments (including for example option and swap fees and expenses); (v) borrowing costs (such as interest and dividend expense on securities sold short); (vi) taxes; and (vii) extraordinary expenses, such as litigation expenses (which may include indemnification of Fund officers and Trustees, contractual indemnification of Fund service providers (other than the Adviser))), will not exceed 1.25% of the daily average net assets attributable to each Fund. These fee waivers and expense reimbursements are subject to possible recoupment from each Fund within three years after the fees have been waived or reimbursed, if such recoupment can be achieved within the lesser of the foregoing expense limits and any expense limits in place at time of waiver. This agreement may be terminated only by the Board on 60 days' written notice to the Adviser. Fee waiver and reimbursement arrangements can decrease a Fund's expenses and boost its performance.

During the fiscal year ended February 28, 2025, each Fund paid an aggregate of the percentage shown below of its average net assets to the Adviser (after fee waivers and recapture, as applicable):

Fund	Net Management Fee Received After Waivers/Recoupment
Ambassador Income Index ETF	0.90%
Blue Chips Core Index ETF	0.93%
Dividend Plus ETF	0.85%
ProCap Index ETF	0.85%
Select Subsector ETF	0.85%
Volume Factor Dividend Tree ETF	0.85%
Volume Factor Global Unconstrained ETF	0.85%

**INVESTMENT SUB-ADVISER:** Penserra Capital Management LLC, located at 4 Orinda Way, Suite 100, Orinda, CA 94563, serves as the Funds’ investment sub-adviser. As of February 28, 2025, the Sub-Adviser had approximately \$12.5 billion in assets under management. Under the supervision of the Adviser, the Sub-Adviser is responsible for making investment decisions and executing portfolio transactions for the Funds. In addition, the Sub-Adviser is responsible for maintaining certain transaction and compliance related records of the Funds. As compensation for the sub-advisory services it provides to the Funds, the Adviser will pay the Sub-Adviser a portion of its advisory fee pursuant to an agreement between the Adviser and Sub-Adviser (the “Sub-Advisory Agreement”).

A discussion regarding the basis for the Board of Trustees’ renewal of the Investment Advisory and Sub-Advisory Agreement for Ambassador Income Index ETF, Blue Chips Core Index ETF and ProCap Index ETF is available in the Funds’ Form N-CSR dated February 28, 2025. A discussion regarding the basis for the Board of Trustees’ approval of the Investment Advisory and Sub-Advisory Agreement for Dividend Plus ETF, Select Subsector ETF, Volume Factor Dividend Tree ETF and Volume Factor Global Unconstrained ETF is available in the Funds’ Form N-CSR dated August 31, 2024.

## PORTFOLIO MANAGERS

**Dustin Lewellyn** has been a Managing Director with the Sub-Adviser since 2012. He was President and Founder of Golden Gate Investment Consulting LLC from 2011 through 2015. Prior to that, Mr. Lewellyn was a managing director at Charles Schwab Investment Management, Inc. (“CSIM”), which he joined in 2009, and head of portfolio management for Schwab ETFs. Prior to joining CSIM, he worked for two years as director of ETF product management and development at a major financial institution focused on asset and wealth management. Prior to that, he was a portfolio manager for institutional clients at a financial services firm for three years. In addition, he held roles in portfolio accounting and portfolio management at a large asset management firm for more than 6 years.

**Ernesto Tong** has been a Managing Director with the Sub-Adviser since 2015. Prior to joining Penserra, Mr. Tong spent seven years as a vice president at Blackrock, where he was a portfolio manager for a number of the iShares ETFs, and prior to that, he spent two years in the firm’s index research group.

**Christine Johanson** has served as a Director with Penserra since 2023. Ms. Johanson was a Director on the US Transition Management Team at BlackRock from 2022-2023. Prior to that, Ms. Johanson served as the global Head of Fixed Income Transition for Russell Investments for four years.

The SAI provides additional information about each Portfolio Manager’s compensation, other accounts managed and ownership of Fund shares.

## HOW SHARES ARE PRICED

---

Shares of a Fund are bought and sold at a price in two different ways depending upon the type of investor.

All investors including retail investors and authorized participants may buy and sell Shares in secondary market transactions through brokers at market prices and Shares will trade at market prices.

Only authorized participants may buy and redeem Shares from a Fund directly and those transactions are effected at the Fund's NAV.

The NAV of a Fund is determined at close of regular trading (normally 4:00 p.m. Eastern Time) on each day the Exchange is open for business. NAV is computed by determining, the aggregate market value of all assets of the applicable Fund, less its liabilities, divided by the total number of shares outstanding ((assets-liabilities)/number of shares = NAV). The Exchange is closed on weekends and New Year's Day, Martin Luther King, Jr. Day, Presidents' Day, Good Friday, Memorial Day, Juneteenth National Independence Day, Independence Day, Labor Day, Thanksgiving Day and Christmas Day ("Exchange Close"). The NAV takes into account, the expenses and fees of a Fund, including management, administration, and distribution fees, which are accrued daily. The determination of NAV for a Fund for a particular day is applicable to all applications for the purchase of shares, as well as all requests for the redemption of shares, received by the Fund (or an authorized broker or agent, or its authorized designee) before the close of trading on the Exchange on that day.

Generally, a Fund's portfolio securities, including securities issued by ETFs, are valued each day at the last quoted sales price on each security's primary exchange. Securities traded or dealt in upon one or more securities exchanges (whether domestic or foreign) for which market quotations are readily available and not subject to restrictions against resale shall be valued at the last quoted sales price on the primary exchange or, in the absence of a sale on the primary exchange, at the mean between the current bid and ask prices on such exchange. Securities primarily traded in the National Association of Securities Dealers' Automated Quotation System ("NASDAQ") National Market System for which market quotations are readily available shall be valued using the NASDAQ Official Closing Price. Securities that are not traded on any securities exchange (whether domestic or foreign) and for which over-the-counter market quotations are readily available generally shall be valued at the last sale price or, in the absence of a sale, at the mean between the current bid and ask price on such over-the-counter market. Debt securities not traded on an exchange may be valued at prices supplied by a pricing agent(s) based on broker or dealer supplied valuations or matrix pricing, a method of valuing securities by reference to the value of other securities with similar characteristics, such as rating, interest rate and maturity.

If market quotations are not readily available, securities will be valued at their fair market value as determined using the "fair value" procedures approved by the Board of Trustees. The Board of Trustees has delegated execution of these procedures to the Adviser as its valuation designee (the "Valuation Designee"). Fair value pricing involves subjective judgments and it is possible that the fair value determined for a security may be materially different than the value that could be realized upon the sale of that security. The fair value prices can differ from market prices when they become available or when a price becomes available. The Valuation Designee may also enlist third party consultants such as an audit firm or financial officer of a security issuer on an as-needed basis to assist the Valuation Designee in determining a security-specific fair value. The Board of Trustees is responsible for reviewing and approving the fair value methodologies utilized by the Valuation Designee at least quarterly, which approval shall be based upon whether the Valuation Designee followed the valuation procedures established by the Board of Trustees.

A Fund may use independent pricing services to assist in calculating the value of the Fund's portfolio securities. In addition, market prices for foreign securities are not determined at the same time of day as the NAV for a Fund. Because a Fund may invest in underlying ETFs which hold portfolio securities primarily listed on foreign exchanges, and these exchanges may trade on weekends or other days when the underlying ETFs do not price their shares, the value of some of the Fund's portfolio securities may change on days when you may not be able to buy or sell Fund Shares.

## HOW TO BUY AND SELL SHARES

---

Shares of the Ambassador Income Index ETF are listed for trading on the Exchange under the symbol MAMB, shares of the Blue Chips Core Index ETF are listed on the Exchange under the symbol MBCC, shares of the Dividend Plus ETF are listed for trading on the Exchange under the symbol MDPL, shares of the ProCap Index ETF are listed for trading on the Exchange under the symbol MPRO, shares of the Select Subsector ETF are listed for trading on the Exchange under the symbol MSSS, shares of the Volume Factor Dividend Tree ETF are listed for trading on the Exchange under the symbol MVFD and shares of the Volume Factor Global Unconstrained ETF are listed for trading on the Exchange under the symbol MVFG. Share prices are reported in dollars and cents per Share. Shares can be bought and sold on the secondary market throughout the trading day like other publicly traded shares and Shares typically trade in blocks of less than a Creation Unit. There is no minimum investment required. Shares may only be purchased and sold on the secondary market when the Exchange is open for trading. The Exchange is open for trading Monday through Friday and is closed on weekends and the following holidays, as observed: New Year's Day, Martin Luther King, Jr. Day, Presidents' Day, Good Friday, Memorial Day, Juneteenth National Independence Day, Independence Day, Labor Day, Thanksgiving Day and Christmas Day.

When buying or selling Shares through a broker, you will incur customary brokerage commissions and charges, and you may pay some or all of the spread between the bid and the offered price in the secondary market on each leg of a round trip (purchase and sale) transaction.

Only Authorized Participants may buy and redeem Shares from a Fund directly and those transactions are effected at the Fund's NAV. Prior to trading in the secondary market, shares of a Fund are "created" at NAV by market makers, large investors and institutions only in block-size Creation Units or multiples thereof. Each Authorized Participant has entered into an agreement with the Distributor. An Authorized Participant is a member or participant of a clearing agency registered with the SEC, which has a written agreement with a Fund or one of its service providers that allows such member or participant to place orders for the purchase and redemption of Creation Units.

A creation transaction, which is subject to acceptance by the Distributor and a Fund, generally takes place when an Authorized Participant deposits into the Funds a designated portfolio of securities, assets or other positions (a "creation basket"), and an amount of cash (including any cash representing the value of substituted securities, assets or other positions), if any, which together approximate the holdings of the Funds in exchange for a specified number of Creation Units. Similarly, shares can be redeemed only in Creation Units, generally for a designated portfolio of securities, assets or other positions (a "redemption basket") held by a Fund and an amount of cash (including any portion of such securities for which cash may be substituted). A Fund may substitute cash for any Fund Security and Creation Units may be redeemed for a substantial portion of cash. Except when aggregated in Creation Units, shares are not redeemable by the Funds. Creation and redemption baskets may differ and the Funds will accept "custom baskets." Authorized Participants may create or redeem Creation Units for their own accounts or for customers, including, without limitation, affiliates of the Fund.

The prices at which creations and redemptions occur are based on the next calculation of NAV after a creation or redemption order is received in an acceptable form under the authorized participant agreement.

In the event of a system failure or other interruption, including disruptions at market makers or Authorized Participants, orders to purchase or redeem Creation Units either may not be executed according to the Fund's instructions or may not be executed at all, or a Fund may not be able to place or change orders.

To the extent a Fund engages in in-kind transactions, the Fund intends to comply with the U.S. federal securities laws in accepting securities for deposit and satisfying redemptions with redemption securities by, among other means, assuring that any securities accepted for deposit and any securities used to satisfy redemption requests will be sold in transactions that would be exempt from registration under the Securities Act of 1933, as amended (the "1933 Act"). Further, an Authorized Participant that is not a "qualified institutional buyer," as such term is defined in Rule 144A under the 1933 Act, will not be able to receive restricted securities eligible for resale under Rule 144A.

Creations and redemptions must be made through a firm that is either a member of the Continuous Net Settlement System of the National Securities Clearing Corporation or a DTC participant that has executed an agreement with the Distributor with respect to creations and redemptions of Creation Unit aggregations. Information about the procedures regarding creation and redemption of Creation Units (including the cut-off times for receipt of creation and redemption orders) is included in the Funds' SAI.

Because new shares may be created and issued on an ongoing basis, at any point during the life of a Fund a "distribution," as such term is used in the 1933 Act, may be occurring. Broker-dealers and other persons are cautioned that some activities on their part may, depending on the circumstances, result in their being deemed participants in a distribution in a manner that could render them statutory underwriters subject to the prospectus delivery and liability provisions of the 1933 Act. Any determination of whether one is an underwriter must take into account all the relevant facts and circumstances of each particular case.

Broker-dealers should also note that dealers who are not “underwriters” but are participating in a distribution (as contrasted to ordinary secondary transactions), and thus dealing with shares that are part of an “unsold allotment” within the meaning of Section 4(a)(3)(C) of the 1933 Act, would be unable to take advantage of the prospectus delivery exemption provided by Section 4(a)(3) of the 1933 Act. For delivery of prospectuses to exchange members, the prospectus delivery mechanism of Rule 153 under the 1933 Act is available only with respect to transactions on a national securities exchange.

Each Fund may liquidate and terminate at any time without shareholder approval.

### **Premium/Discount Information**

Retail investors buy and sell Shares in secondary market transactions through brokers at market prices and Shares trade at market prices. The market price of Shares may be greater than, equal to, or less than a Fund’s NAV. Market forces of supply and demand, economic conditions and other factors may affect the trading prices of Shares.

### **Book Entry**

Shares are held in book entry form, which means that no stock certificates are issued. The Depository Trust Company (“DTC”) or its nominee is the record owner of all outstanding Shares and is recognized as the owner of all Shares for all purposes.

Investors owning Shares are beneficial owners as shown on the records of DTC or its participants. DTC serves as the securities depository for all Shares. Participants in DTC include securities brokers and dealers, banks, trust companies, clearing corporations and other institutions that directly or indirectly maintain a custodial relationship with DTC. As a beneficial owner of Shares, you are not entitled to receive physical delivery of stock certificates or to have Shares registered in your name, and you are not considered a registered owner of Shares. Therefore, to exercise any right as an owner of Shares, you must rely upon the procedures of DTC and its participants. These procedures are the same as those that apply to any other securities that you hold in book entry or “street name” form.

## **FREQUENT PURCHASES AND REDEMPTIONS OF FUND SHARES**

---

The Board has not adopted a policy of monitoring for other frequent trading activity because shares of the Funds are listed for trading on a national securities exchange.

## **DISTRIBUTION AND SERVICE PLAN**

---

The Funds have adopted a distribution and service plan (“Plan”) pursuant to Rule 12b-1 under the 1940 Act. Under the Plan, the Funds are authorized to pay distribution fees to the distributor and other firms that provide distribution and shareholder services (“Service Providers”). If a Service Provider provides these services, each Fund may pay fees at an annual rate not to exceed 0.25% of average daily net assets, pursuant to Rule 12b-1 under the 1940 Act.

No distribution or service fees are currently paid by the Funds and will not be paid by the Funds unless authorized by the Trust’s Board of Trustees. There are no current plans to impose these fees. In the event Rule 12b-1 fees were charged, over time they would increase the cost of an investment in the Funds.

## **DIVIDENDS, OTHER DISTRIBUTIONS AND TAXES**

---

Shares are traded throughout the day in the secondary market on a national securities exchange on an intra-day basis and are created and redeemed in-kind and/or for cash in Creation Units at each day's next calculated NAV. In-kind arrangements are designed to protect ongoing shareholders from the adverse effects on a Fund's portfolio that could arise from frequent cash redemption transactions. In a mutual fund, redemptions can have an adverse tax impact on taxable shareholders if the mutual fund needs to sell portfolio securities to obtain cash to meet net fund redemptions. These sales may generate taxable gains for the ongoing shareholders of the mutual fund, whereas Shares' in-kind redemption mechanism generally will not lead to a tax event for the Fund or its ongoing shareholders.

Ordinarily, dividends from net investment income, if any, are declared and paid quarterly by the Funds. The Funds distribute their net realized capital gains, if any, to shareholders annually. The Funds may also pay a special distribution at the end of a calendar year to comply with federal tax requirements.

No dividend reinvestment service is provided by the Funds. Broker-dealers may make available the DTC book-entry Dividend Reinvestment Service for use by beneficial owners of the Funds for reinvestment of their dividend distributions. Beneficial owners should contact their broker to determine the availability and costs of the service and the details of participation therein. Brokers may require beneficial owners to adhere to specific procedures and timetables. If this service is available and used, dividend distributions of both income and realized gains will be automatically reinvested in additional whole shares of the Funds purchased in the secondary market.

Distributions in cash may be reinvested automatically in additional whole Shares only if the broker through whom you purchased Shares makes such option available.

### **Taxes**

As with any investment, you should consider how your investment in Shares will be taxed. The tax information in this Prospectus is provided as general information. You should consult your own tax professional about the tax consequences of an investment in Shares.

Unless your investment in Shares is made through a tax-exempt entity or tax-deferred retirement account, such as an individual retirement account, you need to be aware of the possible tax consequences when:

- The Funds make distributions,
- You sell your Shares listed on the Exchange, and
- You purchase or redeem Creation Units.

### **Taxes on Distributions**

Distributions from a Fund's net investment income, including net short-term capital gains, if any, are taxable to you as ordinary income, except that a Fund's dividends attributable to its "qualified dividend income" (*i.e.*, dividends received on stock of most domestic and certain foreign corporations with respect to which the Fund satisfies certain holding period and other restrictions), if any, generally are subject to federal income tax for non-corporate shareholders who satisfy those restrictions with respect to their Shares at the rate for net capital gain. A part of a Fund's dividends also may be eligible for the dividends-received deduction allowed to corporations -- the eligible portion may not exceed the aggregate dividends the Fund receives from domestic corporations subject to federal income tax (excluding real estate investment trusts) and excludes dividends from foreign corporations -- subject to similar restrictions. However, dividends a corporate shareholder deducts pursuant to that deduction are subject indirectly to the federal alternative minimum tax.

In general, your distributions are subject to federal income tax when they are paid, whether you take them in cash or reinvest them in a Fund (if that option is available). Distributions reinvested in additional Shares through the means of a dividend reinvestment service, if available, will be taxable to shareholders acquiring the additional Shares to the same extent as if such distributions had been received in cash. Distributions of net long-term capital gains, if any, in excess of net short-term capital losses are taxable as long-term capital gains, regardless of how long you have held Shares.

Distributions in excess of a Fund's current and accumulated earnings and profits are treated as a tax-free return of capital to the extent of your basis in Shares and as capital gain thereafter. A distribution will reduce a Fund's NAV per Share and may be taxable to you as ordinary income or capital gain (as described above) even though, from an investment standpoint, the distribution may constitute a return of capital.

By law, a Fund is required to withhold 24% of your distributions and redemption proceeds if you have not provided the Fund with a correct Social Security number or other taxpayer identification number and in certain other situations.

## **Taxes on Exchange-Listed Share Sales**

Any capital gain or loss realized upon a sale of Shares is generally treated as long-term capital gain or loss if Shares have been held for more than one year and as short-term capital gain or loss if Shares have been held for one year or less. The ability to deduct capital losses from sales of Shares may be limited.

## **Taxes on Purchase and Redemption of Creation Units**

An authorized participant that exchanges securities for Creation Units generally will recognize a gain or a loss equal to the difference between the market value of the Creation Units at the time of the exchange and the sum of the exchanger's aggregate basis in the securities surrendered plus any Cash Component it pays. An authorized participant that exchanges Creation Units for securities will generally recognize a gain or loss equal to the difference between the exchanger's basis in the Creation Units and the sum of the aggregate market value of the securities received plus any cash equal to the difference between the NAV of Shares being redeemed and the value of the securities. The Internal Revenue Service (the "Service"), however, may assert that a loss realized upon an exchange of securities for Creation Units cannot be deducted currently under the rules governing "wash sales" or for other reasons. Persons exchanging securities should consult their own tax advisor with respect to whether wash sale rules apply and when a loss might be deductible.

Any capital gain or loss realized upon redemption of Creation Units is generally treated as long-term capital gain or loss if Shares have been held for more than one year and as short-term capital gain or loss if Shares have been held for one year or less.

If an Authorized Participant purchases or redeems Creation Units, the authorized participant will be sent a confirmation statement showing how many Shares the authorized participant purchased or sold and at what price. See "Tax Status" in the SAI for a description of the newly effective requirement regarding basis determination methods applicable to Share redemptions and the Fund's obligation to report basis information to the Service.

The foregoing discussion summarizes some of the possible consequences under current federal tax law of an investment in the Funds. It is not a substitute for personal tax advice. Consult your personal tax advisor about the potential tax consequences of an investment in Shares under all applicable tax laws. See "Tax Status" in the SAI for more information.

## **FUND SERVICE PROVIDERS**

---

Ultimus Fund Solutions, LLC is the Funds' administrator and fund accountant. It has its principal office at 225 Pictoria Drive, Suite 450, Cincinnati, Ohio 45246, and is primarily in the business of providing administrative, fund accounting and transfer agent services to retail and institutional mutual funds and exchange traded funds.

Brown Brothers Harriman & Co., 50 Post Office Square, Boston, Massachusetts, 02110-1548, is the Funds' transfer agent and custodian.

Northern Lights Distributors LLC, 4221 North 203rd Street, Suite 100, Elkhorn, Nebraska, 68022-3474, is the distributor for Shares. The Distributor is a registered broker-dealer and member of the Financial Industry Regulatory Authority, Inc. ("FINRA").

Thompson Hine LLP, 41 South High Street, 17th Floor, Columbus, Ohio 43215, serves as legal counsel to the Trust.

Cohen & Company Ltd., 1835 Market St., Suite 310, Philadelphia, PA 19103, serves as the Funds' independent registered public accounting firm. The independent registered public accounting firm is responsible for auditing the annual financial statements of the Funds.

## OTHER INFORMATION

---

### Continuous Offering

The method by which Creation Units of Shares are created and traded may raise certain issues under applicable securities laws. Because new Creation Units of Shares are issued and sold by the Funds on an ongoing basis, a “distribution,” as such term is used in the 1933 Act, may occur at any point. Broker-dealers and other persons are cautioned that some activities on their part may, depending on the circumstances, result in their being deemed participants in a distribution in a manner which could render them statutory underwriters and subject them to the prospectus delivery requirement and liability provisions of the 1933 Act.

For example, a broker-dealer firm or its client may be deemed a statutory underwriter if it takes Creation Units after placing an order with the Distributor, breaks them down into constituent Shares and sells Shares directly to customers or if it chooses to couple the creation of a supply of new Shares with an active selling effort involving solicitation of secondary market demand for Shares. A determination of whether one is an underwriter for purposes of the 1933 Act must take into account all the facts and circumstances pertaining to the activities of the broker-dealer or its client in the particular case, and the examples mentioned above should not be considered a complete description of all the activities that could lead to a characterization as an underwriter.

Broker-dealer firms should also note that dealers who are not “underwriters” but are effecting transactions in Shares, whether or not participating in the distribution of Shares, are generally required to deliver a prospectus. This is because the prospectus delivery exemption in Section 4(3) of the 1933 Act is not available in respect of such transactions as a result of Section 24(d) of the 1940 Act. As a result, broker-dealer firms should note that dealers who are not “underwriters” but are participating in a distribution (as contrasted with engaging in ordinary secondary market transactions) and thus dealing with Shares that are part of an overallotment within the meaning of Section 4(3)(C) of the 1933 Act, will be unable to take advantage of the prospectus delivery exemption provided by Section 4(3) of the 1933 Act. For delivery of prospectuses to exchange members, the prospectus delivery mechanism of Rule 153 under the 1933 Act is only available with respect to transactions on a national exchange.

**Dealers effecting transactions in Shares, whether or not participating in this distribution, are generally required to deliver a Prospectus. This is in addition to any obligation of dealers to deliver a Prospectus when acting as underwriters.**

## FINANCIAL HIGHLIGHTS

The following tables are intended to help you better understand each Fund's financial performance since its inception. Certain information reflects financial results for a single Fund share. Total return represents the rate you would have earned (or lost) on an investment in each Fund, assuming reinvestment of all dividends and distributions. This information has been audited by Cohen & Company, Ltd., an independent registered public accounting firm, whose report, along with the Funds' financial statements, is included in the annual Form N-CSR, which is available upon request.

# PRIVACY NOTICE

## NORTHERN LIGHTS FUND TRUST IV

Rev. April 2021

### FACTS

#### WHAT DOES NORTHERN LIGHTS FUND TRUST IV DO WITH YOUR PERSONAL INFORMATION?

#### Why?

Financial companies choose how they share your personal information. Federal law gives consumers the right to limit some, but not all sharing. Federal law also requires us to tell you how we collect, share, and protect your personal information. Please read this notice carefully to understand what we do.

#### What?

The types of personal information we collect and share depends on the product or service that you have with us. This information can include:

- Social Security number and wire transfer instructions
- account transactions and transaction history
- investment experience and purchase history

When you are *no longer* our customer, we continue to share your information as described in this notice.

#### How?

All financial companies need to share customers' personal information to run their everyday business. In the section below, we list the reasons financial companies can share their customers' personal information; the reasons Northern Lights Fund Trust IV chooses to share; and whether you can limit this sharing.

Reasons we can share your personal information:	Does Northern Lights Fund Trust IV share information?	Can you limit this sharing?
<b>For our everyday business purposes</b> - such as to process your transactions, maintain your account(s), respond to court orders and legal investigations, or report to credit bureaus.	<b>YES</b>	<b>NO</b>
<b>For our marketing purposes</b> - to offer our products and services to you.	<b>NO</b>	<b>We don't share</b>
<b>For joint marketing with other financial companies.</b>	<b>NO</b>	<b>We don't share</b>
<b>For our affiliates' everyday business purposes</b> - information about your transactions and records.	<b>NO</b>	<b>We don't share</b>
<b>For our affiliates' everyday business purposes</b> - information about your credit worthiness.	<b>NO</b>	<b>We don't share</b>
<b>For nonaffiliates to market to you</b>	<b>NO</b>	<b>We don't share</b>
